Focus on Cellular Biochemistry

- 125 Eger, A., Foisner, R. Dynamics and cross talk of junctional proteins: a molecular basis for the regulation of cell adhesion and epithelial polarity
- 134 Praetor, A., Ellinger, I., Fuchs, R., Hunziker, W. Transcytosis of immunoglobulin G
- 140 Magin, T. M., Hesse, M., Schröder, R. Novel insights into intermediate-filament function from studies of transgenic and knockout mice

Original Papers

- 151 Zachariadis, M., Galatis, B., Apostolakis, P. Study of mitosis in root-tip cells of *Triticum turgidum* treated with the DNA-intercalating agent ethidium bromide
- 165 Ritzenthaler, C., Findlay, K., Roberts, K., Maule, A. J. Rapid detection of plasmodesmata in purified cell walls
- 172 Ueda, M., Kuroiwa, T., Matsunaga, S., Ogihara, S. Microtubule-dependent migration of the cell nucleus toward a future leading edge in amoebae of *Physarum polycephalum*
- 183 Enns, L. C., Canny, M. J., McCully, M. E. An investigation of the role of solutes in the xylem sap and in the xylem parenchyma as the source of root pressure
- 198 Blanco-Molina, A., Martín-Escalante, D., Bravo, D., González-Reyes, J. A., López-Miranda, J., Ordovás, J. M., López-Segura, F., Jiménez-Pérez, J. A., Pérez-Jiménez, F. High-density lipoproteins protect endothelial cells from apoptosis induced by oxidized low-density lipoproteins
- 207 Harper, J. D. I., Fowke, L. C., Gilmer, S., Overall, R. L., Marc, J. A centrin homologue is localised across the developing cell plate in gymnosperms and angiosperms
- 217 von Recklinghausen, I. R., Iwanowska, A., Kieft, H., Mordhorst, A. P., Schel, J. H. N., van Lammeren, A. A. M. Structure and development of somatic embryos formed in *Arabidopsis thaliana pt* mutant callus cultures derived from seedlings
- 225 Schwuchow, J. M., Kern, V. D., Wagner, T., Sack, F. D. The density of apical cells of dark-grown protonemata of the moss *Ceratodon purpureus*
- 234 Nick, P., Heuing, A., Ehmann, B. Plant chaperonins: a role in microtubule-dependent wall formation?
- 245 Hahn, K. Diurnal changes in xylem pressure and mesophyll cell turgor pressure of the liana *Tetrastigma voinierianum* – the role of cell turgor in long-distance water transport: a comment
- 247 Bentrup, F.-W., Zimmermann, U. Diurnal changes in xylem pressure and mesophyll cell turgor pressure of the liana *Tetrastigma voinierianum* – the role of cell turgor in long-distance water transport: a reply
- 248 Impressum
