

4.2	Methyl methacrylate-Acrylonitrile-Butadiene-Styrene (MABS)	59
	General	59
	The Aromatic Main Products	59
	Benzene in MABS	60
	Suggestions for Future Investigations.....	60
4.3	Polyamide-6 (PA-6)	61
	Amide Formation.....	61
	Analytical Problems with Caprolactam.....	61
	Suggestions for Future Investigations.....	62
4.4	Poly(vinyl chloride) (PVC)	62
	General	62
	Main Radiolysis Products	62
	HCl and Vinylchloride ?	62
	Suggestions for Future Investigations.....	63
4.5	High-Density Polyethylene (HDPE)	64
	General	64
	Effects on Hydrocarbons / Ethylene-Oligomers.....	64
	Low-MW Oxidized Products	65
	Degradation Products of Antioxidants.....	65
	Suggestions for Future Investigations.....	65
4.6	Polypropylene (PP)	66
	General	66
	The Main Product: 1,3-(1,1-Dimethylethyl)-benzene	66
	Trace Aromatic Products	66
	Non-Aromatic 'Volatiles'	66
	Suggestions for Future Investigations.....	67
4.7	Granulates (Polymer Pellets) vs. Injection-Molded Parts	68
4.8	Analytical Resumé	68
5	Polyethylene and Polypropylene Films	69
5.1	Retention of Radiolysis Products in LDPE Films	69
5.2	LDPE Films vs. LDPE Pellets	72
5.3	Comparison of Ten Different LDPE Films	72
5.4	The Effect of Desorption Temperature	73
5.5	High-Temperature Thermal Desorption	74
5.6	Radiation-Induced Artifacts ?	75
5.7	Polypropylene Films	76
5.8	Cyclic Radiolysis Products ?	78
5.9	SIM-Analyses of Low-Dose Irradiated LDPE	78
