

TABLE OF CONTENTS PAGE

INTRODUCTION	3
METHODS	3
I. PATHOPHYSIOLOGICAL BASIS FOR THE CLINICAL INDICATIONS	4
1. Cardiovascular system	4
2. Lung physiology and gas exchange	4
3. Venous blood return	4
4. Perfusion of intraabdominal organs	4
5. Stress response and immunologic parameters	4
6. Peritonitis	4
7. Risk of tumor spreading	4
II. ESTABLISHING THE PNEUMOPERITONEUM	5
1. Creation of a pneumoperitoneum	5
2. Gas embolism and its prevention	5
3. Choice of insufflation pressure	5
4. Warming and humidifying of insufflation gas	5
5. Abdominal wall lifting devices	5
6. Size of access devices	5
III. POSTOPERATIVE ASPECTS	5
1. Adhesions	5
2. Pain, nausea and vomiting	6
3. Pregnancy	6
4. Intracranial pressure	6
5. Abdominal trauma	6
