PROBIOTICS – STATE OF THE ART	
<hr/>	
Probiotics: State of the art in the USA <i>Mary Ellen Sanders</i>	1
Recent progress of the probiotic studies in Japan <i>Ryuichiro Tanaka and Koichi Watanabe</i>	7
<hr/>	
METHODOLOGY	
<hr/>	
Novel techniques to identify the species composition of complex microbial systems: Restriction site tagged microarrays (RST) and NotI signatures <i>Eugene R. Zabarovsky, Lev Petrenko, Alexei I. Protopopov, Veronika Zabarovska, Olga Vorontsova, Yanyan Zhao, Alexey Kutsenko, Gelena Kilosanidze, Bertil Pettersson, Vladimir I. Kashuba, Olle Ljungqvist, Elisabeth Norin, Tore Midtvedt, Gösta Winber, Roland Möllby, and Ingemar Ernberg</i>	17
Molecular monitoring of bacterial populations during induced colitis in rats reveals changes in dominant faecal microbiota <i>Marie-France de la Cochetière, Catherine Michel, Christine Cherbut, Jean-Paul Galmiche, Joël Doré</i>	23
Selection of lactic acid bacteria as probiotic strains by <i>in vitro</i> tests <i>Danuta Kruszewska, Jिंगgang Lan, Graciela Lorca, Naoko Yanagisawa, Ingela Marklinder, and Asa Ljungh</i>	37
Estimation of lactobacilli, enterococci and bifidobacteria in faecal samples by quantitative bacteriology and fish <i>Jelena Shchepetova, Epp Sepp, Pirje Hütt, and Marika Mikelsaar</i>	51
Characterisation of intestinal lactobacilli by phenotypic properties and genotyping <i>Heidi Annuk, Jelena Štšepetova, and Marika Mikelsaar</i>	61
