

# QSAR & Combinatorial Science

Volume 22, Number 2/2003

April 2003

Pages 181–324

WITH ABSTRACT SERVICE

## Papers/News Section

- |     |   |  |
|-----|---|--|
| 183 | R. Breton, G. Schüürmann<br>and R. Purdy  | Preface  |
| 185 | Klaus L. E. Kaiser  | Neural networks for effect prediction in environmental and health issues using large datasets  |
| 191 | Anna Pino, Alessandro Giuliani and<br>Romualdo Benigni  | Toxicity Mode-of-action: Discrimination via Infrared Spectra And Eigenvalues of the Modified Adjacency Matrix                                |
| 196 | Grace Patlewicz, David W. Roberts<br>and John D. Walker   | QSARs for the skin sensitization potential of aldehydes and related compounds  |
| 204 | Andrew D. P. Worgan,<br>John C. Dearden, Robert Edwards,<br>Tatiana I. Netzeva and<br>Mark T. D. Cronin | Evaluation of a Novel Short-Term Algal Toxicity Assay by the Development of QSARs and Inter-Species Relationships for Narcotic Chemicals     |
| 210 | Marco Pintore, Nadège Piclin,<br>Emilio Benfenati, Giuseppina Gini<br>and Jacques R. Chrétien           | Predicting Toxicity against the fathead Minnow by Adaptive Fuzzy Partition   |
| 220 | David W Roberts and<br>Jayne F. Costello  | QSAR and Mechanism of Action For Aquatic Toxicity of Cationic Surfactants  |
| 226 | David W. Roberts and<br>Jayne F. Costello   | Mechanisms of action for general and polar narcosis: A difference in dimension   |
| 234 | Monica Enache, John C. Dearden and<br>John D. Walker  | QSAR analysis of metal ion toxicity data in sunflower callus cultures ( <i>Helianthus annuus</i> "Sunspot")                                  |
| 241 | David R. Ownby and<br>Michael C. Newman   | Advances in Quantitative Ion Character-Activity Relationships (QICARs): Using Metal-Ligand Binding Characteristics to Predict Metal Toxicity |
| 247 | Tapan Sanghvi, Nina Ni,<br>Michael Mayersohn and<br>Samuel H. Yalkowsky                                 | Predicting Passive Intestinal Absorption Using A Single Parameter  |
| 258 | Tapan Sanghvi, Neera Jain,<br>Gang Yang and Samuel H. Yalkowsky   | Estimation of Aqueous Solubility By The General Solubility Equation (GSE) The Easy Way   |
| 263 | Na'ngono Manga, Judith C. Duffy,<br>Philip H. Rowe and Mark T. D.<br>Cronin                             | A Hierarchical QSAR Model for Urinary Excretion of Drugs in Humans as a Predictive Tool for Biotransformation                                |
