

Wissenschaftliche Beiträge.....	202
Plenary Addresses / Plenarvorträge .....	202
Methoden und programmatische Aspekte der Arbeitswissenschaft/Ergonomie .....	202
<i>Ergonomics Methodology and Programmatic Aspects of Work Science</i> .....	202
Produkt-Ergonomie <i>Bubb H.</i> .....	202
Aufgaben, Ziele und Methoden arbeitswissenschaftlicher Bemühungen auf dem Gebiet der Produktions-Ergonomie <i>Strasser H.</i> .....	202
Arbeit und Organisation <i>Frieling E.</i> .....	203
From a worker science to a customer-oriented work science <i>Zink K.J.</i> .....	204
Umsetzung arbeitswissenschaftlicher Erkenntnisse in die Praxis – Vorstellungen der Verbände, Tarifpartner und Förderinstitutionen sowie der Wissenschaft.....	204
<i>Transfer of Ergonomics Knowledge into Work Design – Roles and Expectations of Professional Associations, Trade Unions and Employers, Governmental Granting Institutions and the Scientific Community</i> .....	204
Arbeitswissenschaft und Betriebspraxis – Bedingungen für eine Orientierung auf die Anforderungen der Unternehmen <i>Schultetus W.</i> .....	204
Nachhaltigkeit im Arbeitsschutz – Chance für Mensch, Umwelt, Wirtschaft in einer globalisierten Welt <i>Bieneck H-J.</i> .....	204
Nutzen und Defizite arbeitswissenschaftlicher Erkenntnisse für die Betriebsratsarbeit – Anforderungen an künftige arbeitswissenschaftliche Fragestellungen aus der Sicht von Betriebsräten <i>Schoch M.</i> .....	205
Die zweite Hälfte der Zeit: GfA und die Forschungsförderung <i>Skarpelis C.</i> .....	205
Ergonomics and industrial practice <i>Landau K.</i> .....	206
Product Ergonomics / Produkt-Ergonomie .....	206
Advanced Information Systems and Research Approaches for Workload and Performance Measurements in Road Vehicles .....	206
<i>Moderne Informationssysteme und Forschungsansätze zur Messung von Leistung und Beanspruchung von PKW-Fahrzeugführern</i> .....	206
Development of advanced driver attention metrics (ADAM) <i>Breuer J, Bengler K, Heinrich C,     Reichelt W.</i> .....	206
Driver workload monitoring <i>Mayser C, Piechulla W, Weiss K-E, König W.</i> .....	206
Driver distraction: Influence of secondary task performance on real-world driving <i>Eckstein L, Heß     M, Rakic M.</i> .....	207
Investigation of visual demand in a static driving simulator within the ADAM project <i>Bengler K,     Huesmann A, Praxenthaler M.</i> .....	207
Assessing driver distraction using occlusion method and peripheral detection task <i>Baumann M, Jahn     G, Rösler D, Krems J.</i> .....	207
The lane-change-task as a tool for driver distraction evaluation <i>Mattes S.</i> .....	208
Driving Behavior Measurement and Emotional Impacts from Human-Computer Interaction.....	208
<i>Fahrzeugführungsverhalten unter diversen Einflussfaktoren und emotionale Aspekte der Mensch- Computer-Interaktion</i> .....	208
Driver behaviour during left turn – A field and a simulator experiment <i>Meyer O, Didier M.</i> .....	208
Safety benefits of advanced brake light design <i>Unsel T.G, Beier G.</i> .....	208
Effect of vibration on readability task performance in a city way driving environment <i>Muzammil M,     Murtaza Q, Khan AA, Zaidi SNM.</i> .....	209
Affective interaction – Measuring mood with mouse and keyboard <i>Zimmermann P, Guttormsen     Schär S.</i> .....	209
Anthropometric and Biomechanic Tools and Measurement Techniques.....	209
<i>Anthropometrische und biomechanische Werkzeuge und Messmethoden</i> .....	209
Digital image processing for the determination of body movements in young children <i>Seitz T, Stüdeli     T, Menozzi M.</i> .....	209
Optimizing working conditions in construction machines using a CAD-based 3D man model <i>Kaiser     R, Klein T.</i> .....	210
A biomechanical model for ride vibration <i>Fritzsche F.</i> .....	210
A virtual reality driving simulator for ergonomic assessments <i>Ullrich NG, Salsedo F, Bergamasco     M, Ruspa C, Quattrocchio S.</i> .....	210
A data (sensorized) suit and data (sensorized) glove for ergonomic analysis <i>Ullrich NG, Vilella P,     Salsedo F, Bergamasco M.</i> .....	211
Model-based GUI-development with autoCAID <i>Zuehlke D, Mukasa K.</i> .....	211
Computer-Aided Testing and Information Provision.....	212
<i>Computergestützte Testverfahren und Informationsbereitstellung</i> .....	212

Dem Ophthalmologen abgeschaut: Verbesserung der automatisierten Sehschärfebestimmung durch Erfassung der Antwortzeit <i>Stüdeli T, Menozzi M</i> .....	212
Delay perception thresholds in human-computer interaction: Fundamentals for CSCW-applications <i>Zuberbühler H-J, Krueger H, Kündig A</i> .....	213
Effect of cellular telephone use on tracking accuracy in a simple tracking task <i>Tarawneh IS, Bishu RR</i> .....	213
Maintenance of the motivation to access an internet-based information system <i>Stein M, Müller BH</i> .....	214
Ergonomic Evaluation Tools for Physical Workload .....	214
<i>Ergonomische Methoden zur Beurteilung physischer Arbeitsbelastung</i> .....	214
Ergonomic product, machinery and workplace design in relation to relevant European directives <i>Ringelberg AJ</i> .....	214
A UK perspective of workplace design <i>Boocock M</i> .....	215
The OCRA methods to evaluate risks for the upper limbs in relation to relevant European directives <i>Colombini D, Occhipinti E</i> .....	215
The "New production worksheet" <i>Schaub K</i> .....	215
Investigations into Comfort and Discomfort (Sitting, Walking, Reading) .....	216
<i>Untersuchungen zu Komfort und Beschwerden (bei Tätigkeiten im Sitzen, Gehen und Lesen)</i> .....	216
Package independent seat positions in passenger vehicles <i>Paul GE, Queisser S, Rabe S, Akdemir S, Bruder R</i> .....	216
Method and apparatus for predicting seat discomfort <i>Mergl C</i> .....	216
A contribution to the thermo-physiologic assessment of climate seats in passenger vehicles <i>Paul GE, Ackert H</i> .....	217
Climate comfort in shoes <i>Kurz B, Uedelhoven WH, Schreiner J, Glitz KJ</i> .....	217
Individual discomfort depending on a change of angles in the main joints of the human body <i>Zacher I, Bubb H</i> .....	217
Subjektive Beurteilung verschiedener Schriftgrößen in Bezug auf den Lesekomfort <i>Menozzi M, Rehor M</i> .....	218
Methods for Product Ergonomics Design .....	218
<i>Methoden zur ergonomischen Gestaltung von Produkten</i> .....	218
Extra-Ordinary Ergonomics <i>Kroemer KHE</i> .....	218
Ergonomic approach for developing products aimed at older users: Method and product cases <i>Härö J-M, Väyrynen S</i> .....	219
Ergonomie im Produktentwicklungsprozess <i>Göbel M</i> .....	219
The automated anthropometric data collection and evaluation from 3D scanning human models <i>Wang M-JJ, Lin Y-C, Wu W-Y</i> .....	219
Design Approaches for Sensory and Motoric Interfaces .....	220
<i>Sensorische bzw. informationstechnische und motorische Schnittstellengestaltung</i> .....	220
Ergonomic and design approach to create a new product <i>Held J</i> .....	220
Designing an interface for a complex worksystem – A process report <i>Bönisch B, Held J, Krueger H</i> .....	220
Interfacing for anaesthesia – Recommendations for respirators from ergonomical and users' point of view <i>Bönisch B, Held J, Krueger H</i> .....	221
Problems of the comfort and discomfort in technology and medicine. Computer aided modelling of the working environment and working tools. <i>Winkler T, Dzieniakowski T, Jaworski-Horoszkiewicz M</i> .....	221
A method to improve information design for building maintenance <i>Attaianesi E, Caterina G, Duca G</i> .....	222
Inclusive design of information society technologies – Approaches and challenges <i>Leidermann F, Weber H, Zink KJ</i> .....	222
Production Ergonomics / Produktions-Ergonomie .....	223
Risk Assessment Tools .....	223
<i>Methoden zur Gefährdungsanalyse</i> .....	223
Identification of hazardous tasks in the roofing industry <i>Fredericks TK, Choi SD, Abudayyeh O, Butt S</i> .....	223
A stepwise approach for chemical risks assessment at the workplace <i>Mairiaux P, Balsat A, Dujardin M, De Graeve J, Albert A</i> .....	223
A model for selecting risk assessment tools for industrial plants <i>Ray PS, Srinivasan R</i> .....	224
A review of safety and ergonomic issues in the roofing industry <i>Fredericks TK, Choi SD, Abudayyeh O, Rodriguez J</i> .....	224
Strain Index Method: Applied to analyse jobs for risk distal upper extremity disorders. Experience in a Chilean textile industry. <i>Fuentes JCH</i> .....	224
A "system-of systems" model of risk approach <i>Andrew M, Hampshire E, Webb J</i> .....	225
