

CALL FOR SCIENCE PAPERS

EJHP is seeking articles on topics of interest to hospital pharmacists.

Papers covering any aspects of the work of hospital pharmacists in Europe will be considered.

The purpose of this Journal is to share experiences among hospital pharmacists across Europe.

The most frequently submitted types of articles include Original Articles, Review Articles, Brief Reports, Case Reports, and Letters to the Editor.

All manuscripts are subject to review by qualified independent reviewers and the editors. Articles will be accepted for publication if they are judged to represent an important contribution to the literature.

If you are interested in submitting a manuscript, please send it to science@ejhp.org.

Guidance on the format of articles is available at the end of the Scientific Section of this Journal.

All articles are published in English but there is professional editorial help available to correct grammar and translations.

Alternatively, please contact the Science Assistant on science@ejhp.org for a copy of the EJHP Guidance to Authors.

MODERN WOUND CARE IS COST-EFFECTIVE AND AMOUNTS TO MERELY 20% OF CONVENTIONAL WOUND CARE COST 48

A survey comparing cost-effectiveness of conventional and modern wound care approaches

Herbert Jenzer, Armando J. Bastos Bettencourt, Sophie Maillard

MILD TO MODERATE POSTOPERATIVE PAIN MANAGEMENT: IMPLEMENTATION OF A CLINICAL PRACTICE GUIDELINE 56

Despite technological advances in anaesthesia and analgesia, reported pain levels after day surgery remain high. Development of minor analgesic combinations is useful to improve patients' comfort in the postoperative period.

José Manuel Martínez Sesmero, M. Teresa Molina García, Jesús Estrada Fernández, Yolanda Castellanos Clemente, Marta García Palomo, Raúl Díez Fernández, Dr. Cristóbal Montojo Guillén

STABILITY OF RANITIDINE HYDROCHLORIDE IN DIFFERENT AQUEOUS SOLUTIONS 60

The stability of ranitidine hydrochloride at two concentrations (25 mg/ml and 50 mg/ml) in eight different aqueous solutions was studied.

MO.Ferreira, M.F. Bahia, P. Costa
