**Ziel** Die Medizinische Klinik ist das offizielle Organ der Deutschen Gesellschaft für Innere Medizin. Die Medizinische Klinik vermittelt aktuelles, klinisch anwendbares Fachwissen der Inneren Medizin sowie ihrer Grenzgebiete, soweit deren Ergebnisse für Internisten relevant sind. Sie informiert über aktuelle Forschungsergebnisse und bietet eine optimale Fortbildung zum State-of-the-Art. Veröffentlicht werden frei eingereichte Originalarbeiten, Übersichten und Fallberichte, die einem Review-Verfahren unterzogen werden. Daneben erscheinen in unregelmäßigen Abständen Beiträge in der Rubrik „Diagnostik im Bild“ als wichtiges Fortbildungsmedium. In der Rubrik „Standorte“ werden Vorträge und Meinungsäußerungen wichtiger Persönlichkeiten der Inneren Medizin oder aus Nachbargebieten publiziert, die nicht in jedem Fall abgestimmte Inhalte wiedergeben und gelegentlich durchaus provozierenden Charakter haben sollen. Die Rubrik „Perspektiven“ unterstützt die interdisziplinäre Zusammenarbeit in den Kliniken und informiert fundiert und kompetent über wesentliche Entwicklungen. Mitteilungsseiten der DGIM berichten über wichtige Ereignisse in der Gesellschaft.

## Aims & Scope

Medizinische Klinik is the official journal of the German Society of Internal Medicine (DGIM). Medizinische Klinik provides its readers with up-to-date information about internal medicine and allied fields insofar as the latter impact upon internal medicine. The journal aims to acquaint its readers with the latest data on relevant research and developments, and offers them an optimal opportunity to ensure that their knowledge is always state-of-the-art. The journal publishes freely submitted original articles, reviews, and case records that are subjected to a review process prior to publication. In addition, contributions falling under the heading “Pictorial Diagnosis” are presented at irregular intervals, and are envisaged as an important further educational medium. Under the column heading “Point of View”, the journal publishes articles and opinions written by prominent personages active in the field of internal medicine or associated fields, the contents of which are not always harmonized, and which occasionally are of a deliberately provocative nature. The column “Perspectives” is intended to promote interdisciplinary cooperation in hospitals, and provides well-founded and competent information on major developments. Finally, a “What's On” section from the DGIM keeps readers posted on important societal events.
