125 Therapie des Mammakarzinoms – Wandel von der radikalen zur qualitätskontrollierten individualisierten Therapie

Therapy of Breast Cancer – Change from Radical to Quality-Controlled Individualized Treatment

Fink, D. (Zürich); Kimmig, R. (Essen); Winter, R. (Graz)

The treatment of breast cancer is changing continually, yet the role of the axillary lymph node is still undisputed for its prognosis.

Schwerpunkt:
Mammakarzinom – Aktuelle Therapiekonzepte

127 Grenzen der Sentinel-Lymphknotenbiopsie beim Mammakarzinom
Limitations of Sentinel Lymph Node Biopsy in Breast Cancer

Fehr, M.K. (Zürich)

While the lower morbidity and the false-negative rate of sentinel lymph node biopsy in early breast cancer are established, limitations of this method are still debated.

132 Aromataseinhibitoren in der adjuvanten Therapie des Mammakarzinoms

Aromatase Inhibitors in the Adjuvant Therapy of Breast Cancer

Bauerschlag, D.; Schem, C.; Maass, N.; Jonat, W. (Kiel)

As there is also a benefit concerning disease-free survival, a new therapeutic field opens for the use of 3rd-generation aromatase inhibitors in the adjuvant therapy of breast cancer.

137 Elderly Breast Cancer Patients: Adjuvant Chemotherapy and Adjuvant Endocrine Therapy
Adjuvante Chemotherapie und Endokrintherapie für ältere Brustkrebspatientinnen

Biganzoli, L. (Prato); Aapro, M. (Genolier)

The adjuvant treatment of elderly breast cancer patients needs to be adapted to their comorbidities and life expectancy.

143 Konsensusmeeting der 9th International Conference on Primary Therapy of Early Breast Cancer (St. Gallen, 26.–29. Januar 2005)

Consensus Meeting of the 9th International Conference on Primary Therapy of Early Breast Cancer (St. Gall, January 26–29, 2005)

Thürlimann, B.; Senn, H.J. (St. Gallen)

The consensus conference presented the first results of the BIG 1–98 study and new developments in both chemotherapy and endocrine therapy, i.e. endocrine responsiveness as criterion.

Übersichtsarbeit

147 Von der Schuldfrage zur Fehlerkultur in der Medizin. Risiken, Fehler und Patientensicherheit
From the Concept of Guilt to the Value-Free Notification of Errors in Medicine. Risks, Errors and Patient Safety

Haller, U.; Welti, S.; Haenggi, D.; Fišák, D. (Zürich)

Liability cases and the size of claims due to alleged treatment errors are increasing steadily. The health care system is particularly susceptible to errors. Therefore risk management in the hospital takes top priority, for which the critical incident reporting of the Swiss Society of Gynecology and Obstetrics is the appropriate error notification system.

161 Gesellschaftsnachrichten der «gynécologie suisse»
