

Oberle S, Schober A, Holtmann B, Sendtner M, Unsicker K: Loss of preganglionic sympathetic neurons in mice lacking the leukemia inhibitory factor receptor β (LIFR β)	55
Ochs M, Knudsen L, Mühlfeld C, Gilbert F, Richter J, Hawgood S, Clark H: Treatment with a recombinant fragment of human SP-D largely corrects the lung structural abnormalities in SP-D deficient mice	56
Papantchev V, Paloff A, Hinova-Palova D, Ilieva D, Hristov S, Ovtcharoff W: Parvalbumin immunoreactivity in vestibular nuclei of the cat. Light microscopic and ultrastructural study	57
Pocar P, Nestler D, Risch M, Fischer B: Arylhydrocarbon receptor (AhR) activity during <i>in vitro</i> oocyte maturation	57
Pröls F, Czarnecki PG, Müller TS, Christ B: Post-translational modifications regulate nuclear and membrane targeting of the co-chaperone Mdg1	58
von Rango U, Raven G, Bocken F, Beier HM, Krusche CA: Maternal immune mechanisms to influence trophoblast invasion	58
Rollenhagen A, Söhl L, Sätzler K, Jonas P, Frotscher M, Lübke J: Three-dimensional morphology of a central excitatory synapse: The mossy fiber bouton	59
Roudenok V, Hancharov A, Bogdanovich B, Sokal A, Kühnel W: Vasoactive intestinal polypeptide immunoreactivity in human thymus after chronic thyroiditis	60
Roussa E, Bertram J, Berge KE, Labori KJ, Thévenod F, Ræder MG, Kriegstein K: Differential regulation of vacuolar H ⁺ -ATPase and Na ⁺ /H ⁺ exchanger 3 in rat cholangiocytes after bile duct ligation	60
Seceleanu A, Seceleanu R: Morphological study of mandibular canal and orifices ..	61
Spessert R, Engel L, Lorenzkovski V, Langer C, Rohleder N: The photoperiod affects the molecular clockwork in the rat pineal	61
Szabo B, Szabo I: Anatomy of the orbit in the drawings of Leonardo Da Vinci	62
Szufflińska M, Koleśnik A, Farkowski M, Wiczorek J, Pałka Ł, Cizek B: Arterial supply of fetal adrenal gland. Microanatomical study and literature review	62
Schmidt AN, Opincariu I, Gheban D: Morphology of the hard palate at the end of the embryonic period and beginning of the fetal period	63
Schmidt A, Ick J, Dinter J, Desai B, Mehlhorn, Bloch W, Staib P, Schinköthe T: Interaction of mesenchymal and haematopoietic stem cells	64
Schmiedl A, Vieten G, Mühlfeld C, Bernhard W: Alterations in the distribution of intraalveolar and intracellular surfactant during the postnatal development of rats	64
Schultz C, Politi C, Oikonomidis A, König HG, Del Turco D, Kögel D, Deller T: Enrichment of phospho-Ik β in the axon initial segment precedes that of β IV-spectrin and ankyrin-G	65
Steinritz D, Kehe K, Szinicz S, Bloch W: The damaging process of sulfur mustard in keratinocytes – the role of apoptosis, ROS and NO	65
Streicher J: 3D modelling of gene expression patterns	66
Strzelczyk A, Bendner G, von Bohlen und Halbach O, Klein R, Unsicker K, Strelau J: Growth/differentiation factor-15 knockout mice develop with deficits in distinct neuronal populations	66
Tomov TL, Guntinas-Lichius O, Streppel M, Neiss WF, Angelov DN: Overview of the advantages provided by the combined approach to study neural regeneration ..	67
Tschernig T, Schmiedl A, Lührmann A, Pabst R: The "perivascular space" in the lung tissue during allergic inflammation: Early leakage and infiltration	68
Theilig F, Jerichow T, Willnow T, Le Hir M, Kriz W, Bachmann S: Glomerulonephritis in megalin deficient mice – the role of protein uptake in tubulointerstitial damage ..	68

Thies A, Meyer A, Dauterive I: Lectin I as a new target for a controversial topic
Tonack S, Wobus AM: Action via the AhR pathway
Vigh B, Czirok S, Vincze I: Cerebrospinal fluid (CSF)-contactin in various vertebrates;
Waschke J, Bruggeman J: How do environmental factors cause dissociation of desmoglein 1 transmembrane protein
Wassilev W, Wassilev I: "Anterior cruciate ligament"
Weisheit G, Gliem M, Entschladen F: Inhibitory interneurons in the rat
Welker P, Geist B, Jöns M: Co-expressed with microdomains
Welsch T, Endlich N, Dauterive I, Endlich K: Participation in the regulation of Sp1
Wobus M, Wandel E, Aicher A: Regulation of Sp1
Yilmazer-Hanke, Deniz M, Mawrin C, Schramm J: The nucleus of amygdala
Zillig M, Wurm A, Grehn A: Wildtype and Tyr437
