

Bach A, Wolgast S, Mühlbauer E, Bazwinski I, Peschke E: Receptor (MT1) mediated influence of melatonin on IP3/Ca <sup>2+</sup> signal transduction cascade of the pancreatic $\beta$ -Cell . . . . .	82
Bahramsoltani M, Plendl J: Different anti-angiogenesis drugs induce different forms of anti-angiogenesis . . . . .	82
Baiz H, Ben Henda A, Fontaine C: Morphometric study of the branches of the tibial nerve to the muscles of the leg. Application to the hyponeurotization of the tibial nerve in spasticity treatment . . . . .	83
Bakhmet A, Sapin M, Kühnel W: Microtopographic peculiarities in some peripheral immune system organs of rats under the acute emotional stress influence . . . . .	83
Batbayar B, Zelles T, Fehér E: Morphological evidence of sensory neurons in the root of the rat's tongue . . . . .	84
Bidmon HJ, Igdalova L, Zilles K, Behrends S: Cerebral distribution of the nitric oxide-receptor component, soluble guanylyl cyclase subunit- $\alpha_2$ in monkeys . . . . .	85
Bidmon HJ, Görg B, Hilbig H, Fritschy JM, Zilles K, Behrends S: Co-localization of the nitric oxide-receptor component, soluble guanylyl cyclase subunit- $\alpha_2$ , GABA <sub>A</sub> -receptor subunit- $\alpha_1$ and Scribble during the early phase of barrel formation in rat cerebral cortex . . . . .	85
Bisplinghoff P, Hünigen H, Plendl J: Cellular interactions during luteal angiogenesis and blood vessel regression . . . . .	86
Bloch W, Schmidt A: Opposite effects of endostatin on different endothelial cells . . . . .	87
Bolinteanu S, Marazan O, Grigorita L, Vaida M, Sargan I, Matu C, Motoc A: Aspects of optic nerve microcirculation in bovines . . . . .	87
Bolinteanu S, Vaida M, Motoc A, Sargan I, Grigorita L: The role of diaphragmatic pillars in delimiting the oesophageal hiatus . . . . .	87
Bolinteanu S, Motoc A, Grigorita L, Vaida M, Matu C, Sargan I, Marazan O: Anatomical changes in the anterior ischemic optic neuropathy (A.I.O.N.) . . . . .	88
Bolinteanu S, Sargan I, Vaida M, Grigorita L, Barjica D, Niculescu M, Motoc A: Anatomico-clinical consideration regarding gastric pathology . . . . .	88
Bossowska A, Radziszewski P, Gonkowski S, Wojtkiewicz J, Skobowiat C, Borkowski A, Majewski M: Interstitial cystitis (IC)-induced changes in the distribution pattern of somatostatin- (SOM) and neuropeptide Y-immunoreactive (NPY-IR) nerve fibers in porcine urinary bladder . . . . .	89
Brause C, Mayr G, Gasse H: Individual variations of the splenius capitis muscle and of the rectus capitis ventralis muscle in the Common Swift ( <i>Apus apus</i> ) . . . . .	90
Brömme HJ, Weinandy R, Peschke E: Influence of oxygen on the generation of reactive oxygen species by alloxan and glutathione . . . . .	90
Bruns AF, Haastert K, Grothe C, Claus P: Nuclear dynamics of the survival of motoneuron (SMN) protein in living cells . . . . .	91
Brylla E, Krohn K, Schmücking E, Morgenthaler N, Schröder S, Aust G: Graves' disease and Hashimoto's thyroiditis in a monozygotic twin pair . . . . .	91
Bühlmeyer K, Daniel H, Döring F, Kindermann B, Mougios V, Schönfelder M, Schulz T, Michna H: Alterations of gene expression in the colon mucosa and detection of plasma IGF-1 and testosterone level in response to moderate physical activity . . . . .	92
Bühlmeyer K, Daniel H, Döring F, Kindermann B, Schönfelder M, Schulz T, Michna H: Micro-array analysis: gene expression in the colon mucosa influenced by physical activity . . . . .	93
Burger S, Drenckhahn D, Waschke J: Rac-1 and Rho A antagonistically regulate endothelial cell adhesion and contraction . . . . .	93

Cambrea M, Unc O, Hifi M: The effect of tamoxifen on the growth of breast tumor. Technol Appl Biol Sci . . . . .
