

Dehghani F, Conrad A, Kohl A, Korf HW, Hailer NP: Depletion of microglia by the bisphosphonate clodronate and its effect on excitotoxic neuronal damage . . . .	206
Draeger A, Monastyrskaya K, Babiychuk EB: Statin-associated myopathy: why skeletal muscle is the target of choice for cholesterol-lowering drugs . . . . .	207
Drakew A, Deller T, Frotscher M: Welche Rolle spielt der Spineapparat für die Ca <sup>2+</sup> -Kinetik in Dendritenspines? . . . . .	208
Dresbach T, Wittenmayer N, Garner CC, Ziv NE, Gundelfinger ED, Kirsch K: Formation of active zone precursor organelles at the neuronal Golgi-apparatus . . . . .	208
Endlich K, Otey C, Kriz W, Endlich N: Detection of stress fiber assembly at focal adhesions . . . . .	209
Fester L, Ribeiro-Gouveia V, Rune GM: Estrogen and neurogenesis in rat hippocampus . . . . .	209
Förster C, Silwedel C, Golenhofen N, Drenckhahn D: Investigation of blood-brain barrier qualities in immortalised microcapillary endothelial cells generated from mouse brain . . . . .	210
Gruemmer R, Fechner S, Schwarzer F, Absenger Y, Schmidt M, Winterhager E: An in vivo-model to investigate cell biological mechanisms involved in the pathogenesis of peritoneal endometriosis . . . . .	210
Guijarro C, Rutz S, Naumann T, Tronche F, Jackisch R, Frotscher M, Kretz O: Maturation of cholinergic medial septum neurons depends on endogenous glucocorticoid signalling . . . . .	211
Haastert K, Mauritz C, Lipokatić E, Timmer M, Grothe C: Towards regenerative therapy: Adult Schwann cells and 21/23kD-FGF-2-isoforms – genetic engineering and regenerative capacities in peripheral nerve repair across long gaps . . . . .	212
Haberberger RV, Hartmann P, Kummer W: Aktivierung des muskarinischen M2-Rezeptors inhibiert die NO-Synthese primär afferenter Neurone . . . . .	212
Heimrich B, Vogt J, Skutella T: Blockierung des Guidance-moleküls RGMA führt zum Verlust der laminären Termination entorhinaler Afferenzen im Gyrus dentatus . . . . .	213
Höltje M, Hoffmann A, Hofmann F, Grosse G, Just I, Ahnert-Hilger G: Rho-dependent and -independent effects of C3 proteins on neuronal and astrocytic process formation . . . . .	213
Huber K, Ernsberger U, Goridis C, Brunet JF, Unsicker K: The role of Phox2B in chromaffin cell development . . . . .	214
John A, Birchmeier C, Britsch S: Global gene expression analysis for the identification of novel genes involved in the development of the dorsal spinal cord . . . . .	214
Jöns T, Wittschieber D, Beyer A, Meier C, Brune A, Thomzig A, Ahnert-Hilger G, Veh R: K-ATP channel-related protein complexes-potential transducers in the regulation of tight-junction permeability . . . . .	215
Jörns A, Hedrich HJ, Tiedge M, Lenzen S: Überwiegen der proinflammatorischen Zytokine mit zunehmender Infiltration der Inseln und ihre Persistenz in den drainierenden Lymphknoten der LEW.1AR1/Ztm-iddm Ratte, einem Tiermodell des Typ 1 Diabetes mellitus . . . . .	216
Kötter R., Bozkurt A, Zilles K: Charakteristische Muster der Rezeptorverteilungen und Assoziationsfasern entsprechen komplementären funktionellen Differenzierungen im Gyrus cinguli von Makaken . . . . .	216
Krasteva G, Kummer W, König P: Distribution of caveolins and interaction between caveolin-1 and -2 in rat airway epithelium detected by CLSM and fluorescence resonance energy transfer . . . . .	217
Kressel M: Regulation der Zellkernlokalisation des NF2 Tumorsuppressor Proteins . . . . .	218

Kurz B, Lemke AK, Klüsener H: Interleukin-1 on the regulation of neuronal development . . . . .	
Männer J, Brand T: A role for the development of the proepicardial-function . . . . .	
Moeller MJ, Braun GS, Gammie F: FAT1 ist an der Steigerung der neuronalen Differenzierung essentiell für Ausbildung der motorischen Neuronen . . . . .	
Müller TS, Christ B, Pröls F, Groth G: The E2F Binding Protein p107 is essential for postnatal lung development . . . . .	
Nawrotzki R, Wittenmayer N: The role of neurotransmitter receptors in the development of the brain . . . . .	
Nestler D, Risch M, Pälsson O: The role of during in vitro maturation of neurons . . . . .	
Paddenberg R, Faulhaber S: The role of organ-specific increased expression of murine aorta and lung . . . . .	
Peterziel H, Lissanu-D'Amico A: The role of promoted intracellular signaling . . . . .	
Prange-Kiel J, von Schantz M: The role of estrogen in the development of the brain . . . . .	
Pröls F, Eehalt F, Rodighiero E: The role of Emx2 bei der Entwicklung des Gehirns . . . . .	
Pufe T, Groth G, Mentlein M: The role of of Pleiotrophin (PTN) in the development of the brain . . . . .	
Roussa E, Brandes A, Gammie F: The role of exchanger (NHE) in the regulation of submandibular gland development . . . . .	
Schmidt A, Ladage D, Schwinger RHG, Adamek H: The role of Voraussetzung zur Identifizierung von . . . . .	
Schmiedl A, Hohlfeld JM, Groth G: Does treatment with . . . . .	
Schmitz C: Neuron loss in the development of the brain . . . . .	
Schultz C, König HG, Deller T: The role of D, Deller T: Coincidence of axon initial segment formation . . . . .	
Schumacher S, Brandt M: The role of in the regulation of cell development . . . . .	
Siegelin M, Touzani O, Lissanu-D'Amico A: The role of new antagonist of X in the development of the brain . . . . .	
Staiger JF, Wiechmann M: The role of Schaltkreise in der Entwicklung des Gehirns . . . . .	
zelltypspezifisches Verhalten von Interneuronen . . . . .
