Wirkung von Permeationenhancern auf die
bukale Resorption / In-vitro-, Ex-vivo- und
In-vivo-Studien mit Lorazepam

Effect of Permeation Enhancers on Buccal Absorption / In vitro, ex vivo and in vivo studies with lorazepam

European Genetic Engineering Law

Regulations · Directives · Decisions

Europäisches Gentechnikrecht

Verordnungen · Richtlinien · Entscheidungen

Compiled and edited by Horst Hasskarl

Genetic engineering is a rapidly developing technology which has become an integral part of the pharmaceutical industry. The European Union has adopted a series of measures to regulate the use of genetic engineering in the pharmaceutical industry. The present edition contains the respective texts in both German and English.

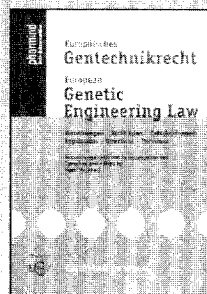

At present there are no other publications available of the novel Food Directive which will be a welcome completion to the information of the pharmaceutical industry. EC Regulation proposals concerning Novel Food, Novel Food and traceability and labelling have been published.

These recent developments caused the editor and the publishing house to compile all relevant EC-Regulations and EC-Directives in a book.

The present edition contains the respective texts in both German and English.

Target groups

Biotechnology companies · Project managers working in the genetic engineering sector of the pharmaceutical industry · Law offices · Members of authorities working in health, science, development and environmental departments National authorities responsible for the granting of permissions pertaining to genetic engineering laws · Authorized persons in charge of biological safety at universities · Companies organizing the training of biological safety · Breeders of experimental animals
