

## 7 Program

## Abstracts

Page	Abstract-Number	
23	O 1	<i>N. Mandler, A. Breitenbach, J. Merwerth, N. Mueller, C. Steinbrecher:</i> The Direct Drive Centrifugal Pump RotAssist: Electrical and Hydraulic Design and Performance
23	O 2	<i>A. Untaroiu, X. Song, H. G. Wood, P. E. Allaire, A. L. Throckmorton, D. B. Olsen:</i> Design and Numerical Analysis of a Novel Axial Flow Left Ventricular Assist Device
23	O 3	<i>T. Yambe, Y. Shiraishi, M. Esashi, Y. Haga, M. Yoshizawa, F. Sato, M. Yoshizawa, K. Imachi, Y. Abe, S. Nitta:</i> Pulsation Device for Rotary Blood Pumps
24	O 4	<i>T. Akamatsu, M. Yamazaki, K. Hattori:</i> Effectiveness of Double Volute and Leak Flow Rate Through Shroud Clearance of Centrifugal Blood Pump with Magnetically Suspended Impellers
24	O 5	<i>T. Kink, H. Reul:</i> Development of a Hydrodynamic Bearing for a Microaxial Pump
24	O 6	<i>K. Sekine, Y. Mitamura, I. Nishimura, S. Murabayashi, R. Yozu:</i> A Magnetic Fluid Shaft Seal for Rotary Blood Pumps: Sealing and Biological Properties
25	O 7	<i>B. Meyns, E. Verbeken, V. Leunens, H. Bollen, W. Kerkhoffs, O. Schumacher, H. Reul, W. Flameng:</i> Animal Testing of Microvad: From Extracorporeal Model to Implantation without Anticoagulation
25	O 8	<i>R. Autschbach, L. Demircan, S. Christiansen, W. Buhre, S. Nikolin, J. M. Schröder, P. Kwant, M. Akdis, H. Reul:</i> Left Heart Support with the Newly Developed Microdiagonal Blood Pump
26	O 9	<i>M. Behr:</i> Benefits and Pitfalls of Computational Fluid Dynamics in the Development of Centrifugal Blood Pumps: Predicting Flow Patterns, Hemolysis, and Performance
26	O 10	<i>A. Untaroiu, A. L. Throckmorton, X. Song, H. G. Wood, P. E. Allaire:</i> Design Requirements for an Axial Flow Blood Pump – Challenges Facing a Blood Pump Designer
26	O 11	<i>T. Grönsfelder, R. Nordmann, H. Schima, C. Reindl:</i> Numerical Modeling of a Fluid-Structure-Interaction using CFX-TASCFlow and MATLAB-Simulink: Evaluation and Application to the Hemobear Blood Pump
27	O 12	<i>T. Yano, K. Sekine, A. Mitoh, Y. Mitamura:</i> Computational Fluid Dynamics Analysis of the Valvo Pump, an Intra-ventricular Assist Device
27	O 13	<i>H. Loree, G. Burgreen, K. Bourque, C. Dague, V. Poirier, D. Farrar, E. Hampton, R. Wiesemann, Z. Wu, T. Gempp, R. Schöb:</i> CFD and Flow Visualization of a Maglev Centrifugal LVAD
28	O 14	<i>X. Song, H. G. Wood, D. B. Olsen:</i> Accessories of Rotary Blood Pumps: Cannula, Inducer, Volute, Diffuser and Discharger
28	O 15	<i>W. K. Chan, Y. W. Wong, W. Hu:</i> Effects of Volute Geometry on Blood Trauma – A Numerical Study
28	O 16	<i>G. P. Noon, D. Goldstein, P. McCarthy, D. Morley, E. Teitel:</i> Preliminary Report of the DeBakey VAD® US Feasibility Trial
29	O 17	<i>J. Mueller, Y. Weng, E. V. Potapov, T. Drews, D. Kemper, M. Jurmann, R. Hetzer:</i> Clinical Application of the First Left Ventricular Cardiac Assist Device without any Wear and Tear
