European Genetic Engineering Law

Regulations · Directives · Decisions

Europäisches Gentechnikrecht

Verordnungen · Richtlinien · Entscheidungen

Compiled and edited by Horst Hasskarl

Since the two detailed Council Directives on the "Contained Use" and the "Deliberate Release" in April 1990, the European Genetic Engineering Law has been amended again and again. Problems of Genetic Engineering, including all legal regulations, find an increasing interest of the public.

At present there is being discussed an amendment of the Novel Food Directive, which will add a decisive completion to the information of the customer. To this aim EC Regulation Proposals concerning **Novel Food/Novel Food and traceability and labelling** have been published.

These recent developments caused the editor and the publishing house to compile **all** relevant EC-Regulations and EC-Directives in a book.

The present edition contains the respective texts in both **German and English**.

Target groups

Biotechnology companies · Project managers working in the genetic engineering sector of the pharmaceutical industry · Law offices · Members of authorities working in health, science, development and environmental departments National authorities responsible for the granting of permissions pertaining to genetic engineering laws · Authorized persons in charge of biological safety at universities · Companies organizing the training of biological safety · Breeders of experimental animals
