
Extended Abstracts EMG Symposium Noraxon 2007

- 23 Monitoring of motor recovery and restoration due to neurophysiological interventions
Michaela M. Pinter
- 25 Evaluating Motor Performance in Neurological Rehabilitation with sEMG
W. Klein, S. Kotzian, Michaela Pinter
- 26 Muscular strain and complaints at the upper extremities during office work
A Luttmann, K-H. Schmidt, M. Jäger
- 28 Punctual variations after structural dysfunctions of the sensomotoric system
W Laube, A. v. Stempel, ThBochdansky, K. Benedetto
- 29 New generation of sEMG telemetry, operating with direct signal transmission from the electrodes
D. Bettinelli
- 30 Machine-based pelvic floor muscle training - is it possible?
Anika Stephan, Birgit Schulte-Frei
- 31 The Influence of Different Testing Conditions In Running On Gender Specific EMG
Activity and Kinematics of The Lower Extremity – A Wavelet-Based Analysis
Inga Wissemann, C. Lersch, G-P Brüggemann
- 32 Determination of position of surface electromyographic electrodes for selected equine muscles
H. Zaneb, V. Kaufmann, T. Licka, C. Peham, C. Stanek
- 34 Neuromuscular control of hair combing in healthy subjects and stroke patients.
An approach for functional biofeedback training
Birgit Schulte-Frei, Nina Klingenberg, C, Grüneberg
- 35 Fidelity of the EMG signals and electrode placement
Y. Blanc, U. Dimanico
- 38 The influence of fatiguing running on muscular and foot loading parameters
Investigations For Understanding the Aetiology of Stress Fractures
D. Rosenbaum, R. Weist, E. Eils, A. Nagel, T. Engl
- 39 Event-related surface EMG potentials in typewriting:
The effects of motor program and thermal conditions on EMG pattern
O. Christ, H. Sorgatz, T. Englert
- 41 Pain management operated from a holistic perspective
Monika Fuhs, E. Peper
- 43 Clinical Surface Electromyography in Temporomandibular Dysfunction
T. Shewman
- 46 The influence of sensorimotor training with an instable shoe construction
to the timing and peak activity of the M. tibialis anterior
Th.Bochdansky, M. Mätzler, W. Laube, R. Abboud
- 47 Mechanical and neuromuscular investigations within static and dynamic simulations
of ankle joint injuries
W. Alt, S. Brand
