

<i>hatchadourian, Thodoros Topaloglou</i> DescribeX	149	<i>Joel Arrais, Bruno Santos, João Fernandes, Laura Carreto, Manuel A.S. Santos, José Luis Oliveira</i> GeneBrowser: an approach for integration and functional classification of genomics data	283
<i>ing Schwöbbermeyer and Falk Schreiber</i> Network Resources: Databases,	161	<i>Vaida Jakoniené, Patrick Lambrich</i> A Tool for Evaluating Strategies for Grouping of Biological Data	293
<i>Volker Stümpflen</i> Networks using a generic network analysis suite	173	<i>Bernard de Bono, Imre Vastrik, Peter D'Eustachio, Esther Schmidt, Gopal Gopinath, David Croft, Marc Gillespie, Bijay Jassal, Suzanna Lewis, Lisa Matthews, Guanming Wu, Ewan Birney, Lincoln Stein</i> Reactome: An integrated expert model of human molecular processes and access toolkit	305
<i>oudt, A. Canario, S. Klages,</i> Networks in Expressed Sequence Tags	185	<i>T. Shashi Rekha and Chanchal K Mitra</i> Frequency Analysis of the Splice Site Regions in Different Organisms	317
<i>oli, A. Quattrone, C. Furlanello</i> Network number and gene expression data	195	<i>Feroz Khan, S. P. Singh, B. N. Mishra</i> Conservation of the LexA repressor binding site in <i>Deinococcus radiodurans</i>	341
<i>Lange, Timm Oberwahrenbrock, o Baumbach</i> Networks for early lung cancer detection in human breath	207	<i>Nicola Segata, Enrico Blanzieri and Corrado Priami</i> Towards the integration of computational systems biology and high-throughput data: supporting differential analysis of microarray gene expression data	359
<i>Anna Tschaut, Jenny Russ,</i> Networks of Modules in the Human Protein	219	<i>Christian Kuenne, Ivo Grosse, Inge Matthies, Uwe Scholz, Tatjana Sretenovic-Rajicic, Nils Stein, Andreas Stephanik, Burkhard Steuernagel and Stephan Weise</i> Using Data Warehouse Technology in Crop Plant Bioinformatics	375
<i>ing one-class classification</i> data	229	<i>Index of Authors</i>	391
<i>nds, Karl Fraser, Ping Wang,</i> Networks, characterisation and global	241		
<i>d Anne-Lise Veuthey</i> Network terminologies.....	261		
<i>pat</i> Networks, SBO, and the SBML models	271
