

111 Wichtige Fortschritte in der adjuvanten Systemtherapie des Mammakarzinoms

Fundamental Advances in the Adjuvant Systemic Therapy of Breast Cancer

Fink, D. (Zürich); Lang, U. (Graz); Kimmig, R. (Essen)

In the last few decades, the notion of breast cancer has developed from a local disease to a systemic illness.

Schwerpunkt: Systemtherapie beim Mammakarzinom

113 Vorhersage des Therapieansprechens beim Mammakarzinom

Predicting Response to Therapy in Breast Cancer

Strunz, K.; Deissler, H.; Kreienberg, R.; Sauer, G. (Ulm)

Molecular staging of breast cancer may become an important prognostic tool and help choose the appropriate adjuvant therapy.

118 High-Risk-Situation – Was ist die beste Chemotherapie?

High-Risk Situation – Which Is the Best Chemotherapy?

von Minckwitz, G. (Neu-Isenburg/Frankfurt)

Risk assessment methods to select as well as current approaches to improve adjuvant chemotherapy for breast cancer patients at high risk for relapse are reviewed.

130 Aktuelle adjuvante endokrine Therapie des Mammakarzinoms

Current Adjuvant Endocrine Treatment of Breast Cancer

Dedes, K.J.; Gabriel, N.; Fink, D. (Zürich)

Endocrine treatment is essential in the therapy of hormone-receptor-positive breast cancer.

138 Adjuvante Therapie des Mammakarzinoms mit Trastuzumab

Adjuvant Therapy of Breast Cancer with Trastuzumab
Beneder, C.; Marth, C. (Innsbruck)

Trastuzumab is directed at HER2 which is overexpressed in about 25–30% of all breast cancers.

Spektrum

143 Vesikovaginale Fisteln – Geburtskomplikationen, die zum Tode führen können. Das Risiko der Fistelbildung in Westafrika

Vesicovaginal Fistulas – Birth Complications Which Can Lead to Death. The Risk of Developing Fistulas in Western Africa
Di Marco, M. (Basel)

An obstetric fistula develops when the blood supply to the tissues of the vagina and the bladder is cut off during prolonged obstructed labour.
