

CONTENTS

Articles

- 1 Mapping quantitative trait loci for cytokines in the pig
X Lu, Y F Gong, J F Liu, Z P Wang, F Hu, X T Qiu, Y R Luo, Q Zhang
- 6 Identification and genetic effect of haplotypes in the promoter region of porcine *myostatin* gene
D Liu, Q Xu, L Zang, S Liang, Y Wu, S Wei, Y Jiang
- 15 High throughput analyses of epistasis for swine body dimensions and organ weights
W H Wei, Y Duan, C S Haley, J Ren, D J de Koning, L S Huang
- 22 The placental growth factor (PGF) – a positional and functional candidate gene influencing calving ease and stillbirth in German dairy cattle
T Seidenspinner, J Tetens, D Habier, J Bennewitz, G Thaller
- 28 Identification of loci associated with tolerance to Johne's disease in Holstein cattle
R Zanella, M L Settles, S D McKay, R Schnabel, J Taylor, R H Whitlock, Y Schukken, J S Van Kessel, J M Smith, H L Neibergs
- 39 Associations between newly discovered polymorphisms in the *Bos taurus growth hormone receptor* gene and performance traits in Holstein–Friesian dairy cattle
S M Waters, M S McCabe, D J Howard, L Giblin, D A Magee, D E MacHugh, D P Berry
- 50 DNA variation in the gene *ELTD1* is associated with tick burden in cattle
L R Porto Neto, R J Bunch, B E Harrison, W Barendse
- 56 Evaluation of the genetic diversity and population structure of Chinese indigenous horse breeds using 27 microsatellite markers
Y H Ling, Y H Ma, W J Guan, Y J Cheng, Y P Wang, J L Han, L Mang, Q J Zhao, X H He, Y B Pu, B L Fu
- 66 Mating practices and the dissemination of genetic disorders in domestic animals, based on the example of dog breeding
G Leroy, R Baumung
- 75 Characterization of a 6K oligonucleotide turkey skeletal muscle microarray
K R B Sporer, W Chiang, R J Tempelman, C W Ernst, K M Reed, S G Velleman, G M Strasburg

Short Communications

- 83 Mapping QTL in the porcine MHC region affecting fatness and growth traits in a Meishan/Large White composite population
W H Wei, T M Skinner, J A Anderson, O I Southwood, G Plastow, A L Archibald, C S Haley
- 86 Divergence time estimates of East Asian and European pigs based on multiple near complete mitochondrial DNA sequences
A I Fernández, E Alves, C Óvilo, M C Rodríguez, L Silió

- 89 A new polymorphism in the *Growth and Differentiation Factor 9 (GDF9)* gene is associated with increased ovulation rate and prolificacy in homozygous sheep
B D M Silva, E A Castro, C J H Souza, S R Paiva, R Sartori, M M Franco, H C Azevedo, T A S N Silva, A M C Vieira, J P Neves, E O Melo
- 93 Hierarchical structure of the Sicilian goats revealed by Bayesian analyses of microsatellite information
M Siwek, R Finocchiaro, I Curik, B Portolano
- 96 Mitochondrial DNA diversity in wild boar from the Primorsky Krai Region (East Russia)
Y Ramayo, I N Shemeret'eva, M Pérez-Enciso
- 100 Regional occurrence, high frequency but low diversity of mitochondrial DNA haplogroup d1 suggests a recent dog-wolf hybridization in Scandinavia
C F C Klütsch, E H Seppälä, T Fall, M Uhlén, Å Hedhammar, H Lohi, P Savolainen
- 104 Association of *MC3R* gene polymorphisms with body weight in the red fox and comparative gene organization in four canids
A Skorczyk, K Flisikowski, M Szydlowski, J Cieslak, R Fries, M Switonski
- 108 A novel 62-bp indel mutation in the promoter region of *transforming growth factor-beta 2 (TGFB2)* gene is associated with body weight in chickens
S Tang, J Ou, D Sun, Y Zhang, G Xu, Y Zhang
- 113 Predicting allele frequencies in DNA pools using high density SNP genotyping data
B L Peiris, J Ralph, S J Lamont, J C M Dekkers
