

CANADIAN JOURNAL OF PLANT SCIENCE

Volume 90, Number 6

November 2010

AGRONOMY SECTION

Grain

Tolerance of three types of winter wheat (*Triticum aestivum* L.) to fluroxypyr plus MCPA ester
L. R. Brown and P. H. Sikkema 785-789

Forty-six years of genetic improvement in Canadian durum wheat cultivars
J. M. Clarke, F. R. Clarke, and C. J. Pozniak 791-801

Molecular Biology

Inheritance of resistance to powdery mildew (*Oidium lycopersicum*) and its linkage to an SSR marker in tomato hybrid DRW4409
C. He, V. Poysa, K. Yu, and C. Shi 803-807

Cloning of the gene encoding cucumber lumazine synthase and an analysis of its promoter activity in cucumber
R. Wang, M. Chen, F. Liao, F. Jiang, B. Ma, Y. Zhang, and M. Li 809-818

Other

Relationships of phenotypic stability measures for genotypes of three cereal crops
R. Mohammadi, M. Roustaei, Y. Ansari, M. Aghaee, and A. Amri 819-830

Performance of tropical early-maturing maize cultivars in multiple stress environments
B. Badu-Apraku, A. Menkir, S. O. Ajala, R. O. Akinwale, M. Oyekunle, and K. Obeng-Antwi 831-852

Cultivar Descriptions

Peregrine hard red winter wheat
D. B. Fowler 853-856

CDC Ptarmigan soft white winter wheat
D. B. Fowler 857-861

Napoleon Amber durum wheat
D. G. Humphreys, T. F. Townley-Smith, D. Leisle, B. McCallum, D. Gaudet, J. Gilbert, and J. Menzies 863-867

AC Minoa barley
T. M. Choo, S. M. ter Beek, R. A. Martin, and J. Rowsell 869-871

Mersea soybean
V. Poysa, L. Woodrow, and K. Yu 873-875

HORTICULTURE SECTION

Fruit

Performance of Jonagold, McIntosh and Novaspy on three new semi-dwarf apple rootstocks in eastern Canada
J. A. Cline, D. Norton, C. G. Embree, and J.-P. Privé 877-883

Temperature affects dry matter production and net carbon exchange rate of lower-ploidy *Fragaria* species and species hybrids
R. M. Harbut, J. A. Sullivan, and J. T. A. Proctor 885-892

PEST MANAGEMENT SECTION

Plant Pathology

Effect of fungicidal seed treatments on the emergence, development, and grain yield of *Fusarium graminearum*-infected wheat and barley seed under field conditions
W. E. May, M. R. Fernandez, and G. P. Lafond 893-904

Effect of fungicide seed treatments on root pathogens of cereal crops under field conditions
M. R. Fernandez, W. E. May, and G. P. Lafond 905-917

Weed Science

Volunteer wheat (*Triticum aestivum* L.) competition in corn (*Zea mays* L.)
G. C. Wilson, N. Soltani, C. J. Swanton, F. J. Tardif, D. E. Robinson, and P. H. Sikkema 919-924

Control of volunteer adzuki bean (*Vigna angularis*) with pre- and postemergence herbicides in corn (*Zea mays*)
C. Kramer, N. Soltani, C. J. Swanton, D. E. Robinson, and P. H. Sikkema 925-932

Control of common cocklebur (*Xanthium strumarium* L.) in corn
N. Soltani, C. Shropshire, and P. H. Sikkema 933-938

Author Index 943-945

Subject Index 947-954

Other

Powdery mildew resistance in soybean PI 243540 is controlled by a single dominant gene
S.-T. Kang and M. A. Rouf Mian 939-942
