

Reviews

Invited Review: Management and feeding strategies to ameliorate the impact of removing antibiotic growth promoters from diets fed to weanling pigs
D. Y. Kil and H. H. Stein 447-460

Invited Review: Effects of lairage and slaughter conditions on animal welfare and pork quality
L. Faucitano 461-469

Welfare, Behaviour and Management

Road transport conditions of slaughter cattle: Effects on the prevalence of dark, firm and dry beef
L. A. Warren, I. B. Mandell, and K. G. Bateman 471-482

Effect of litter size and sex on the birth weight of newborn kids and in the behaviour of primiparous goats before, during and after the parturition
J. Otaí, M. Martínez, A. Quiles, M. L. Hevia, and A. Ramírez 483-490

Linseed meal during early pregnancy increases litter size in pigs without affecting post-natal growth
K. A. Vonnahme, R. C. Zimprich, E. K. Harris, E. P. Berg, D. J. Newman, and D. S. Buchanan 491-493

Meat Science

Bovine biceps femoris is resistant to tenderization by lower-salt moisture enhancement or enzyme addition
Z. Pietrasik and P. J. Shand 495-503

Nonruminant Nutrition

Evaluation of high protein distillers' dried grains as a feed ingredient for broiler chickens
B. Jung and A. B. Batal 505-512

Gut morphology and nutrient retention responses of broiler chicks and White Pekin ducklings to dietary threonine deficiency
N. L. Horn, J. S. Radcliffe, T. J. Applegate, and O. Adeola 513-520

Effects of extra feeding in mid-pregnancy for three successive parities on lean sows' productive performance and longevity
A. Cerisuelo, R. Sala, J. Gasa, D. Carrión, J. Coma, N. Chapinal, and M. D. Baucells 521-528

Thermo-stable *Escherichia coli* phytase improves growth performance and nutrient utilization in broilers fed mash and pelleted corn-soybean-meal-based diets
T. A. Woyengo, A. Emiola, A. Owusu-Asiedu, W. Guenter, P. H. Simmins, and C. M. Nyachoti 529-536

Ruminant Nutrition

Plasma amino acid concentrations and mRNA expression of components related to protein degradation in lambs with nutritionally induced metabolic acidosis
S. L. Greenwood, O. AlZahal, N. G. Purdie, K. C. Swanson, and B. W. McBride 537-546

The influence of supplementation with haylage, haylage plus soybean meal or haylage plus corn dried distillers' grains with solubles on the performance of wintering pregnant beef cows fed wheat straw
K. M. Wood, I. B. Mandell, and K. C. Swanson 547-553

Effect of corn particle size and soybean meal treatment on performance of finishing beef steers fed corn-silage-based diets
D. R. Ouellet, L. Faucitano, D. Pellerin, M. D'Amours, and R. Berthiaume 555-562

Serum micronutrient concentrations in beef cows before and after the summer grazing season
L. M. Van De Weyer, S. Hendrick, and C. L. Waldner 563-574

The effect of Ala293Val single nucleotide polymorphism in the stearoyl-CoA desaturase gene on conjugated linoleic acid concentration in milk fat of dairy cows
L. A. Clark, J. M. Thomson, S. S. Moore, and M. Oba 575-584

Determination of the proportion of the ingested gross energy lost as exhaled methane by dairy goats consuming contrasting concentrate ingredients in mixed rations
M. C. López, L. Ródenas, O. Piquer, E. Martínez, A. Cerisuelo, C. Cervera, and C. Fernández 585-590

Free endotoxins in the feces of lactating dairy cows
S. Li, E. Khafipour, D. O. Krause, J. C. Rodriguez-Lecompte, and J. C. Plaizier 591-594
