

## **Special issue: Complexity and Nonlinearity in Soils**

**Edited by: A.M. Tarquis, N.R.A. Bird, E.M.A. Perrier and J.W. Crawford**

Can complex be simple? J.W. Crawford . . . . .	1
Scaling analysis of hydraulic conductivity and porosity on a sandy medium of an unconfined aquifer reproduced in the laboratory C. Fallico, S. De Bartolo, S. Troisi and M. Veltri . . . . .	3
Soil porous system as heterogeneous complex network J.P. Cárdenas, A. Santiago, A.M. Tarquis, J.C. Losada, F. Borondo and R.M. Benito . . . . .	13
Multiscaling analysis of soil roughness variability R. Garcia Moreno, M.C. Diaz Alvarez, A. Saa Requejo, J.L. Valencia Delfa and A.M. Tarquis . . . . .	22
Soil mineralization: An emergent process? T.M. Addiscott . . . . .	31
Geochemical multifractal distribution patterns in sediments from ordered streams S. Xie, Q. Cheng, X. Xing, Z. Bao and Z. Chen . . . . .	36
Assessing soil particle-size distribution on experimental plots with similar texture under different management systems using multifractal parameters J. Paz-Ferreiro, E.V. Vázquez and J.G.V. Miranda . . . . .	47
Entropy, non-linearity and hierarchy in ecosystems T.M. Addiscott . . . . .	57
Multifractal analysis of Hg pore size distributions in soils with contrasting structural stability J. Paz Ferreiro and E. Vidal Vázquez . . . . .	64
Multivariate conditional stochastic simulation of soil heterotrophic respiration at plot scale M. Herbst, N. Prolingheuer, A. Graf, J.A. Huisman, L. Weihermüller, J. Vanderborght and H. Vereecken . . . . .	74
Land cover monitoring by fractal analysis of digital images J. Velázquez-García, K. Oleschko, J.A. Muñoz-Villalobos, M. Velásquez-Valle, M. Martínez Menes, J.-F. Parrot, G. Korvin and M. Cerca . . . . .	83
Probability density function: A tool for simultaneous monitoring of pore/solid roughness and moisture content K. Oleschko, G. Korvin, L. Flores, F. Brambila, C. Gaona, J.F. Parrot, G. Ronquillo and S. Zamora . . . . .	93
Multiscale percolation properties of a fractal pore network N.R.A. Bird and E. Perrier . . . . .	105
Pattern recognition of geophysical data B. Ehret . . . . .	111
Exploring the effects of the vegetation on passive tracer transport by using the multifractal analysis F.J. Jiménez-Hornero, J.V. Giráldez, A.M. Laguna and T. Vanwalleghem . . . . .	126
