2011 · VOLUME 56 · NUMBER 5

## RESEARCH ARTICLES

### Temperature measurement

*Tobias Wartzek, Jens Mühlsteff and Michael Imhoff* **241**

### Effect of uniaxial stretch on morphology and cytoskeleton of human mesenchymal stem cells: static vs. dynamic loading

*Zahra Goli-Malekabadi, Mohammad Tafazzoli-Shadpour, Mohsen Rabbani and Mohsen Janmaleki* **259**

### Comparison of cortical and cancellous bone remodeling of the pelvis after press-fit cup total hip arthroplasty dependent on patient and prosthesis-specific characteristics: a computed tomography-assisted osteodensitometry study *in vivo*

*Katharina Zingler, Lothar Haeberle, Alexander Kress, Ulrich Holzwarth, Raimund Forst, Lutz A. Mueller and Rainer Schmidt* **267**

### A new system for the treatment of retinal degeneration

*Walter-G. Wrobel, André Banzhaf, Guido Blaess, Carmen Eipper, Alex Harscher, Anuschirawan Hekmat, Andreas Möller, Rainer Mohrlök and Jens Pätzold* **277**

### Bioelectric and biomagnetic measurements are differentially sensitive to spiral currents

*Jens Haueisen, Alexander Dietzel, Mario Liehr, Thomas Weiser, Tarek Elsarnagawy and Matthias E. Bellemann* **283**

### A virtual environment for egocentric and allocentric mental transformations: a study on a nonclinical population of adults with distinct levels of schizotypy

*Martin Steinisch, Valentina Sulpizio, Angelo Andrea Iorio, Alessandra Di Naccio, Jens Haueisen, Giorgia Committeri and Silvia Comani* **291**
