EDITORIAL			
Technically assisted rehabilitation	3		
Special Issue: Technically Assisted Rehabilitation			
Low-cost monitoring of patients during unsupervised robot/computer assisted motivating stroke rehabilitation <i>Michelle J. Johnson, Yuniya Shakya, Elaine Strachota and Sheikh Iqbal Ahamed</i>	5	Amplifier design for EMG recording from stimulation electrodes during functional electrical stimulation leg cycling ergometry <i>Raafat Shalaby, Thomas Schauer, Wolfgang Liedecke and Jörg Raisch</i>	23
MotionTherapy@Home - First results of a clinical study with a novel robotic device for automated locomotion therapy at home <i>Rüdiger Rupp, Harry Plewa, Christian Schuld, Hans Jürgen Gerner, Eberhard P. Hofer and Markus Knestel</i>	11	OrthoJacket: an active FES-hybrid orthosis for the paralysed upper extremity <i>Oliver Schill, Roland Wiegand, Bastian Schmitz, Richard Matthies, Ute Eck, Christian Pylatiuk, Markus Reischl, Stefan Schulz and Rüdiger Rupp</i>	35
		Complementary limb motion estimation for the control of active knee prostheses <i>Heike Vallery, Rainer Burgkart, Cornelia Hartmann, Jürgen Mitternacht, Robert Riener and Martin Buss</i>	45
ORIGINAL ARTICLES			
Modeling of load transmission and distribution of deformation energy before and after healing of basal dental implants in the human mandible <i>Sigmar Kopp, Jiri Kuzelka, Tomas Goldmann, Lucie Himmlöva and Stefan Ihde</i>	53	Biometric measurements inside the model eye using a two wavelengths Fourier domain low coherence interferometer <i>Sascha Birkner, Jens Einighammer, Theo Oltrup, Thomas Bende and Benedikt Jean</i>	65
A physical model of the thermodilution method: influences of the variations of experimental setup on the accuracy of flow rate estimation <i>Mustafa Özbek, H. Fehmi Özel, Nuran Ekerbiçer and Tamer Zeren</i>	59
