

# CONTENTS

BIOMEDIZINISCHE TECHNIK/BIOMEDICAL ENGINEERING  
2011 · VOLUME 56 · NUMBER 6

## RESEARCH ARTICLES

### **Electric impedance tomography for monitoring volume and size of the urinary bladder**

*Steffen Leonhardt, Axel Cordes, Harry Plewa, Robert Pikkemaat, Irina Soljanik, Klaus Moehring, Hans J. Gerner and Rüdiger Rupp* **301**

### **Improving local PCA in pseudo phase space for fetal heart rate estimation from single lead abdominal ECG**

*Zheng Wei, Liu Hongxing and Cheng Jianchun* **309**

### **Effect of malpositioned anterior cruciate ligament replacement on knee joint structures: a biomechanical model**

*Uwe Horas, Stefan A. Meissner, Ralf Kraus, Christian Heiss and Reinhard Schnettler* **321**

### **Pedicle-screw-based dynamic implants may increase posterior intervertebral disc bulging during flexion**

*Hadi N. Boustani, Thomas Zander, Alexander C. Disch and Antonius Rohlmann* **327**

### **Influence of various types of damage on the fracture strength of ceramic femoral heads**

*Viola Wuttke, Hartmut Witte, Katrin Kempf, Thomas Oberbach and Daniel Delfosse* **333**

### **Psychophysiological classification and staging of mental states during meditative practice**

*Thilo Hinterberger, Tsutomu Kamei and Harald Walach* **341**

### **Can contextual online examinations in practical biomedical education increase comprehension and motivation? A pilot project**

*Martin Baumann and Volker Perlitz* **351**
