

# BRITISH POULTRY ABSTRACTS

August 2011

CONTENTS

Volume 7, Number 1

## 2011 SPRING MEETING OF THE WPSA UK BRANCH

- Performance and gut health of poultry in the post-antibiotic era when feeding a novel yeast cell wall technology. *H.K. Lea, Z. Kay, E.J. Burton (née Clarke)*. 1
- Efficacy of a novel form of dietary silicon supplement in reducing lameness in poultry. *F.J. Short, E.J. Burton, D.J. Belton, G.E. Mann, C.C. Perry*. 2
- Does feed withdrawal assist experimental induction of sub-clinical necrotic enteritis in broiler chickens?. *G. Saleem, N. Sparks, J. Houdijk, T. Acamovic, V. Pirgozliev*. 4
- Gene expression changes in the duodenum of broilers infused with *Clostridium perfringens* toxin. *S. Athanasiadou, S.T. Burgess, M.A. Mitchell, R.E. Clutton, J.C. Low, N.H. Sparks*. 5
- Towards improved control of avian pathogenic *Escherichia coli* in poultry. *J.-R. Sadeyen, F. Dziva*. 7
- Assessment and heritabilities of feeding behaviour and performance traits in four different broiler lines. *J.A. Howie, S. Avendano, B.J. Tolkamp, I. Kyriazakis*. 8
- Dense genotyping of previously identified candidate gene loci for eggshell formation uncovers further associations with egg shell quality. *Ian Dunn, Peter Wilson, Dave Waddington, Maureen Bain, Matthias Schmutz, Rudolf Preisinger, Maria Tuiskula-Haavisto, Johanna Vilkki*. 10
- Can Conditioned Place Preference be used to determine hungry broiler preferences for qualitative or quantitative feed restriction?. *L.A. Buckley, V. Sandilands, P.M. Hocking, B.J. Tolkamp, R.B. D'Eath*. 11
- Preference for depth of water in Pekin ducks. *G. Liste, R.D. Kirkden, D.M. Broom*. 15
- Comparing the behaviour of blind and sighted chickens – a model for investigating the importance of vision. *Sophie Collins, Björn Forkman, Helle H. Kristensen, Peter Sandoe, Paul M. Hocking*. 14
- Quantifying the environmental impacts of UK broiler production systems through a Life Cycle Assessment. *I. Leinonen, A.G. Williams, J. Wiseman, J. Guy, I. Kyriazakis*. 15
- Neural predictive control of broiler chicken growth. *T.G.M. Demmers, Y. Cao, S. Gauss, J.C. Lowe, D.J. Parsons, C.M. Wathes*. 17
- Assessing the repeatability of a measurement of vitelline membrane strength (VMS) in a white egg laying pedigree population. *Demetra Lund, I. Dunn, R. Preisinger, M. Schmutz, M. Bain*. 19
- Identifying an optimum  $\omega$ 3: $\omega$ 6 dietary content to improve bone health for laying hens with minimal impacts on production endpoints. *Michael Toscano, Francesca Booth, Tristan Cogan, Lisa Williams, John Tarlton*. 20
- The effect of dietary crude protein and potassium on water intake and excretion by turkeys. *Muhammad Waseem Mirza, Vasil Pirgozliev, Nick Sparks*. 22
- Effects of incorporating a novel bio-ethanol co-product in poultry diets on bird performance. *D.V. Scholey, N.K. Morgan, P. Williams, E.J. Burton*. 23
- The effect of beta-glucanase on the performance of laying hens fed a barley/wheat based diet. *H.V. Masey O'Neill, M.R. Bedford, N. Liu*. 25
- Evaluation of nutritive value of *Icacina oliviformis* seed meal in broiler chicken diets. *H.K. Dei, R.A. Adjokatsé, S. Abdulai, G.K. Amoako, A. Mohammed, G.A. Teye*. 26
- Free-range poultry production by agro-pastoral women in northern Nigeria. *A.O.K. Adesehinwa, M.K. Ajala, B.I. Nwagu, J.O. Saka*. 27
- The effect of fully functional crops and feed intake control on growth, feed efficiency, mortality and profitability of broilers housed in large, modern, climate controlled houses. *David Filmer*. 29
- Assessment of the intestinal integrity of vaccinated broilers infected with experimental coccidiosis by using 4 different approaches. *B. Mansoori, M. Odirisanei*. 30
- A new xylanase/betaglucanase enzyme combination improves the performance of turkeys fed wheat/barley-based diets to 16 weeks of age. *Alexandre Peron, Ceinwen Gilbert, Augustine Owusu-Asiedu, Simon Jewell, Rebecca Croxall*. 32
- Effect of light regimens on growth performance and carcass quality of broiler chicks. *Ibrahim Al-Homidan*. 33
- Effect of enzyme supplemented maize-soybean meal based diet on gut pH and performance of broilers. *R.T.S. Ofongo, S.G. Ikoro, E.A. Iyayi*. 34
- Genetic correlations between feeding behaviour traits and performance traits and the potential for selection for different feeding strategies in broiler lines. *J.A. Howie, S. Avendano, B.J. Tolkamp, I. Kyriazakis*. 36
- Comparison of responses to phytase supplementation by broilers using bone mineralization data of either toe or tibia ash. *F. Khattak, T. Acamovic, O. Olukosi*. 37
- Early responses of sodium-dependent phosphate transporter type IIb in broiler chicks to dietary phosphorus intervention. *O.A. Olukosi, S.A. Adedokun, K.M. Ajuwon, O. Adeola*. 39
- Using Conditioned Place Aversion techniques as a novel tool for measuring affective states: broiler breeders find unpredictable wind aversive. *L.M. Dixon, Q. Liu, V. Sandilands, M. Bateson, B.J. Tolkamp, R.B. D'Eath*. 40
- The effect of dietary glycerol on the crop, ileum and caecum microbiota of broiler chickens. *L.A. McLea, M.E.E. Ball, K. Thompson, K.J. McCracken*. 41
- Host pro-inflammatory cytokine response as a fundamental key to host survival or death in ducks and chickens infected with highly pathogenic avian influenza virus. *S. Kuchipudi, S. Dunham, R. Nelli, G. White, V. Coward, M. Slomka, I. Brown, K. Chow Chang*. 43
- Quantifying the environmental impacts of UK egg production systems through a Life Cycle Assessment. *I. Leinonen, A.G. Williams, J. Wiseman, J. Guy, I. Kyriazakis*. 44
- A novel approach to the isolation and identification of primary myogenic cells from chicken and duck skeletal muscles. *B. Baquero Perez, R.K. Nelli, K.C. Chang*. 46
- Humoral and cell-mediated immune responses in broiler breeder hen maintained on diets containing different levels of methionine. *S.A. Hosseini, M. Zaghari, H. Lotfollahiyan, M. Shivazad, H. Moraveg, F. Afraz, A. Mahdavi, J. Mirabdolbaghi*. 47
- Effects of different levels of guar meal with and without beta-mannanase Hemicell enzyme on performance of commercial Leghorn egg-type layer in second-cycle of production. *Mohammad Hasani, Mansour Rezaei, ZARBAKHT Ansari Pirsaraei*. 48
- Chemical and nutritional evaluation of raw Baobab (*Adansonia digitata*, L.) seed as alternative plant protein source in broiler diet. *S.N. Ukachukwu, L.S. Abdu, O.C. Onwudike*. 50
- The effect of hierarchy on the recognition of shape and colour in the domestic fowl. *Alessio Campanella, Carlos De Luna*. 51
- Intestinal mucosa development in broilers fed different forms of enzyme-supplemented maize bran-based diets. *B.A. Makanjuola, E.A. Iyayi, A.O.K. Adesehinwa*. 52
- The nutritional value for broiler chickens of processed *Jatropha curcas* kernel meal. *V. Pirgozliev, C. Jesson, J. Brooker*. 54
- The effect of dietary nutrient density on litter quality in turkey production. *M.W. Mirza, V. Pirgozliev, N. Sparks*. 55
- Potential for alcohol co-products from potable and bioethanol sources as protein source in poultry diets. *D.V. Scholey, P. Williams, E.J. Burton*. 57
- Experimental induction of sub-clinical Necrotic Enteritis in broiler chickens. *G. Saleem, N. Sparks, J. Houdijk, V. Pirgozliev*. 58
- Preliminary studies on the use of a processed product from cassava (*Manihot esculentum*) peel meal and soybean flour as a substitute for wheat bran in broiler diets. *H.K. Dei, K. Ibrahim, A. Mohammed*. 60
- The potential of chlorophyll based dietary markers to improve egg yolk colour of laying chickens. *M.R.F. Lee, H. Jones, H. Fleming, K.P. Gibson, V.J. Theobald, R.I. Richardson*. 61
- Effect of dietary spent bleaching clay on performance of laying hens. *J. Mirabdolbaghi, H. Lotfollahiyan, A. Mahdavi, S.A. Hosseini, F. Alemi*. 62
- Effect of varying levels of dried sorghum brewery waste on growth performance of broiler chickens. *H.K. Dei, M. Quaicoo, A. Mohammed*. 64
- Efficacy of three types of probiotics in growing broiler chicken diets. *H.K. Dei, G. Oyaleke, A. Mohammed*. 65
- Cowpea (*Vigna unguiculata*) flour as an extender in comminuted guinea fowl (*Numida meleagris*) sausage. *H.K. Dei, V. Andoh, J. Bawah, G.A. Teye*. 66
- Comparison of digesta collection methods for amino acid digestibility measurements in broilers. *H. Dilley, E. Burton*. 67
- Using motivational trade-off paradigms to assess the subjective experience of moderate lameness in broiler chickens. *M.J. Turner, V. Sandilands, L. Baker, D. McKeegan, K.M.D. Rutherford, N.H.C. Sparks*. 68
- Dietary long chain omega-3 polyunsaturated fatty acids in regulating bone fragility in laying hens housed in matched free-range systems. *F. Booth, M.J. Toscano, L.J. Wilkins, S.N. Brown, G.J. Richards, J.F. Tarlton*. 70
- Omega-3 (n3) fatty acid supplemented diets reduces bone breakage and increases bone strength in free range laying hens. *J.F. Tarlton, N.C. Avery, L.J. Wilkins, L. Knott*. 72
- Impact of enhanced biosecurity measures during 'thinning' of poultry flocks on Campylobacter contamination and subsequent flock colonisation. *V.K. Morris, A.M. Ridley, J. Gittins, S. Edge, V.M. Allen*. 73
- New strategies on targeting host response to inflammation by novel dietary means for the purpose of reducing growth promoting antibiotics. *M. Cook, J. Sand*. 74
- Endocrines and host-pathogen interactions. *T.J. Humphrey*. 76
- Current and future issues and opportunities for research in the UK Layer Industry; a Poultry Veterinary Surgeon's perspective. *B.H. Thorp*. 77
- Non-ruminant – host microbial interaction in the gut. *I.E. Mulder*. 79
- Intestinal microbiota of the chicken and intestinal health. *Richard A. Bailey*. 81
