

SHORT COMMUNICATION

- 523 **Synthesis and characterization of highly acetylated sago starch** A. V. Singh, L. K. Nath and M. Guha

RESEARCH ARTICLE

- 528 **Preparation and properties of starch nanocrystals/ carboxymethyl chitosan nanocomposite films** B. Duan, P. Sun, X. Wang and C. Yang
- 536 **Hydrothermal modifications of tropical tuber starches – Effect of ANN on the physicochemical, rheological and gelatinization characteristics** A. N. Jyothi, M. S. Sajeew and J. Sreekumar
- 550 **Effect of dual modification of banana starch and storage time on thermal and crystallinity characteristics of its films** P. B. Zamudio-Flores, F. Gutierrez-Meraz and L. A. Bello-Pérez
- 558 **Effect of physico-chemical properties of tropical starches and hydrocolloids on rice gels texture and noodles water retention ability** I. M. Qazi, S. K. Rakshit and T. Tran
- 570 **Physico-chemical and functional properties of starch isolated from ginger spent** M. N. Madeneni, S. Faiza, R. Ramaswamy, M. Guha and S. Pullabhatla
- 579 **Effects of storage conditions and acid solvent types on structural, mechanical and physical properties of kudzu starch (*Pueraria lobata*)-chitosan composite films** Y. Zhong and Y. Li

-
- 587 **Effect of storage temperature on starch retrogradation of bread staling** J. F. Aguirre, C. A. Osella, C. R. Carrara, H. D. Sánchez and M. del Pilar Buera

RESEARCH ARTICLE

- 595 **Production and characterization of oxidized cassava starch (*Manihot esculenta* Crantz) biodegradable films** R. B. de Pauli, L. B. Quast, I. M. Demiate and L. S. Sakanaka
- 604 **Materials based on maize biopolymers: Effect of flour components on mechanical and thermal behavior** F. Ayadi, C. Bliard and P. Dole
- 616 **Physicochemical, crystalline, and thermal properties of native, oxidized, acid, and enzyme hydrolyzed Chinese yam (*Dioscorea opposita* Thunb) starch** L. Xia, G. Wenyuan, J. Qianqian, W. Yanli, G. Xinhua and H. Luqi
- 625 **Preparation of granular cold-water-soluble corn starch by surface modification with poly(ethylene glycol)** J. Wang, W. Zhai and W. Zheng
- 632 **Production of L(+) lactic acid from sweet sorghum, date palm, and golden syrup as alternative carbon sources** A. K. Yadav, N. K. Bipinraj, A. B. Chaudhari and R. M. Kothari
- 637 **Use of starch granules melting to control the properties of bio-flour filled polypropylene and poly(butylene succinate) composites: Mechanical properties** T. Tran, B.-H. Lee, H.-S. Yang, S. Chotineerarat, K. Sriroth and H.-J. Kim
- 649 **Use of starch granules melting to control the properties of bio-flour filled polypropylene and poly(butylene succinate) composites: Physicochemical properties** T. Tran, B.-H. Lee, H.-S. Yang, S. Chotineerarat, K. Sriroth and H.-J. Kim

SHORT COMMUNICATION

- 655 **Synthesis and evaluation of physicochemical properties of cross-linked *Phaseolus aconitifolius* starch** A. V. Singh and L. K. Nath

RESEARCH ARTICLE

- 661 **Effect of enzyme-modified carboxymethyl starch as a fat replacer on the functional properties of sausages** Z. Luo and Q. Gao
