

Contents

- Review**
- 801 *S. L. Jackson and K. L. Bayliss*
Spore traps need improvement to fulfil plant biosecurity requirements
- Original Articles**
- 811 *D. C. Rennie, V. P. Manolii, T. Cao, S. F. Hwang, R. J. Howard and S. E. Strelkov*
Direct evidence of surface infestation of seeds and tubers by *Plasmodiophora brassicae* and quantification of spore loads
- 820 *S. F. Hwang, H. U. Ahmed, Q. Zhou, S. E. Strelkov, B. D. Gossen, G. Peng and G. D. Turnbull*
Influence of cultivar resistance and inoculum density on root hair infection of canola (*Brassica napus*) by *Plasmodiophora brassicae*
- 830 *K. Sharma, B. D. Gossen and M. R. McDonald*
Effect of temperature on primary infection by *Plasmodiophora brassicae* and initiation of clubroot symptoms
- 839 *T. L. P. O. de Souza, S. N. Dessaune, D. A. Sanglard, M. A. Moreira and E. G. de Barros*
Characterization of the rust resistance gene present in the common bean cultivar Ouro Negro, the main rust resistance source used in Brazil
- 846 *J. Sánchez-Martín, D. Rubiales and E. Prats*
Resistance to powdery mildew (*Blumeria graminis* f.sp. *avenae*) in oat seedlings and adult plants
- 857 *X.-M. Xu*
A simulation study on managing plant diseases by systematically altering spatial positions of cultivar mixture components between seasons
- 866 *M. Berbegal, C. D. Garzón, A. Ortega, J. Armengol, R. M. Jiménez-Díaz and M. M. Jiménez-Gasco*
Development and application of new molecular markers for analysis of genetic diversity in *Verticillium dahliae* populations
- 878 *F. Suffert and I. Sache*
Relative importance of different types of inoculum to the establishment of *Mycosphaerella graminicola* in wheat crops in north-west Europe
- 890 *A. Vicent, D. D. M. Bassimba and D. S. Intrigliolo*
Effects of temperature, water regime and irrigation system on the release of ascospores of *Mycosphaerella nawae*, causal agent of circular leaf spot of persimmon
- 899 *H. V. Silva-Rojas and G. D. Ávila-Quezada*
Phylogenetic and morphological identification of *Colletotrichum boninense*: a novel causal agent of anthracnose in avocado
- 909 *D. G. Schmale, A. K. Wood-Jones, C. Cowger, G. C. Bergstrom and C. Arellano*
Trichothecene genotypes of *Gibberella zeae* from winter wheat fields in the eastern USA
- 918 *K. Eggert, C. Zörb, K. H. Mühling and E. Pawelzik*
Proteome analysis of *Fusarium* infection in emmer grains (*Triticum dicoccum*)
- 929 *A. Thirugnanasambandam, K. M. Wright, N. Havis, S. C. Whisson and A. C. Newton*
Agrobacterium-mediated transformation of the barley pathogen *Ramularia collo-cygni* with fluorescent marker tags and live tissue imaging of infection development

Contents continued on inside back cover

Contents continued from outside back cover

- 938 A.-K. Widmark, B. Andersson, M. Sandström and J. E. Yuen
Tracking *Phytophthora infestans* with SSR markers within and between seasons – a field study in Sweden
- 946 T. R. Pettitt, M. F. Wainwright, A. J. Wakeham and J. G. White
A simple detached leaf assay provides rapid and inexpensive determination of pathogenicity of *Pythium* isolates to ‘all year round’ (AYR) chrysanthemum roots
- 957 Q. X. Meng, X. L. Cui, Y. Bi, Q. Wang, J. J. Hao and X. L. Liu
Biological and genetic characterization of *Phytophthora capsici* mutants resistant to flumorph
- 967 M. Gil, O. Esteban, J. A. García, L. Peña and M. Cambra
Resistance to *Plum pox virus* in plants expressing cytosolic and nuclear single-chain antibodies against the viral RNA NIb replicase
- 977 J. Cubero, I. Gell, E. G. Johnson, A. Redondo and J. H. Graham
Unstable green fluorescent protein for study of *Xanthomonas citri* subsp. *citri* survival on citrus
- 986 C. H. Bock, T. R. Gottwald and P. E. Parker
Distribution of canker lesions on the surface of diseased grapefruit
- 992 D. L. Coyne, L. I. Akpheokhai and A. F. Adeniran
The yam nematode (*Scutellonema bradys*), a potential threat to potato (*Solanum tuberosum*) production in West Africa
- 998 Book Review
