

CONTENTS

VOLUME 22, ISSUE No. 6

September 2011

SPECIAL ISSUE: Handling Complexity and Uncertainty in Environmental Studies,
 Arising from the TIES-GRASPA Joint Conference Held in Bologna in 2009
 Guest Editors: D. Cocchi and E. M. Scott

EDITORIAL

Editorial

D. Cocchi and E. M. Scott 699

SPECIAL ISSUE PAPERS

Functional ANOVA and regional climate experiments: a statistical analysis of dynamic
 downscaling 700

S. R. Sain, D. Nychka and L. Mearns

Looking for similar patterns among monitoring stations. Venice Lagoon application 712

R. Pastres, A. Pastore and S. F. Tonellato

Spatio-temporal disease mapping using INLA 725

B. Schrödle and L. Held

Maximum likelihood estimation of the dynamic coregionalization model with
 heterotopic data 735

A. Fassò and F. Finazzi

Forward likelihood-based predictive approach for space-time point processes 749

M. Chiodi and G. Adelfio

Quantifying local and background contributions to PM₁₀ concentrations in Haute-
 Normandie, using random forests 758

M. Bobbia, F.-X. Jollois, J.-M. Poggi and B. Portier

The use of geadditive models to estimate the spatial distribution of grain weight in an
 agronomic field: a comparison with kriging with external drift 769

B. Cafarelli and A. Castrignanò

Some block designs with nested rows and columns for research on pesticide dose
 limitation 781

M. Kozłowska, A. Łacka, R. Krawczyk and R. J. Kozłowski

Synergistic use of several receptor models (CMB, APCS and PMF) to interpret air
 quality data 789

E. Andriani, M. Caselli, G. de Gennaro, A. Giove and C. Tortorella
