Grape root cell features related to phylloxera resistance and changes of anatomy and endogenous hormones during nodosity and tuberosity formation _____	291
<i>Y.-P. Du, Z.-S. Wang and H. Zhai</i>	
Selective harvesting is a feasible and profitable strategy even when grape and wine production is geared towards large fermentation volumes _____	298
<i>R.G.V. Bramley, J. Ouzman and C. Thornton</i>	
Improving vineyard sampling efficiency via dynamic spatially explicit optimisation _____	306
<i>J.M. Meyers, G.L. Sacks, H.M. van Es and J.E. Vanden Heuvel</i>	
On-the-go sensing of grape berry anthocyanins during commercial harvest: development and prospects _____	316
<i>R.G.V. Bramley, M. Le Moigne, S. Evain, J. Ouzman, L. Florin, E.M. Fadaili, C.J. Hinze and Z.G. Cerovic</i>	
The relationship between sensory attributes and wine composition for Australian Cabernet Sauvignon wines _____	327
<i>A.L. Robinson, D.O. Adams, P.K. Boss, H. Heymann, P.S. Solomon and R.D. Trengove</i>	
Spatial variation in response to 'reduced input' spray programs for powdery mildew and botrytis identified through whole-of-block experimentation _____	341
<i>R.G.V. Bramley, K.J. Evans, K.J. Dunne and D.L. Gobbett</i>	
Shoot thinning effects on seasonal whole-canopy photosynthesis and vine performance in <i>Vitis vinifera</i> L. cv. Barbera _____	351
<i>F. Bernizzoni, S. Civardi, M. van Zeller, M. Gatti and S. Poni</i>	
Influence of fruit ripeness and juice chaptalisation on the sensory properties and degree of typicality expressed by Sauvignon Blanc wines from Marlborough, New Zealand _____	358
<i>B. Pineau, M.C.T. Trought, K. Stronge, M.K. Beresford, M.W. Wohlers and S.R. Jaeger</i>	
Sensory descriptive analysis of Bobal red wines treated with oak chips at different stages of winemaking _____	368
<i>E.G. García-Carpintero, M.A. Gómez Gallego, E. Sánchez-Palomo and M.A. González Viñas</i>	
Effect of delaying budburst on shoot development and yield of <i>Vitis vinifera</i> L. Chardonnay 'Mendoza' after a spring freeze event _____	378
<i>A.P. Friend, M.C.T. Trought, C. Stushnoff and G.H. Wells</i>	
Characterisation and evolution of grape polyphenol profiles of <i>Vitis vinifera</i> L. cv. Tannat during ripening and vinification _____	383
<i>E. Boido, M. García-Marino, E. Dellacassa, F. Carrau, J.C. Rivas-Gonzalo and M.T. Escribano-Bailón</i>	
Susceptibility of 44 grapevine (<i>Vitis vinifera</i> L.) varieties to downy mildew in the field _____	394
<i>S. Boso, V. Alonso-Villaverde, P. Gago, J.L. Santiago and M.C. Martínez</i>
