

CONTENTS

VOLUME 22, ISSUE No. 7

November 2011

Research Article

- Threshold modelling of spatially dependent non-stationary extremes with application to hurricane-induced wave heights 799
P. J. Northrop and P. Jonathan

Discussions

- V. Chavez-Demoulin, A. C. Davison and L. Frossard* 810
D. Cooley 812
I. Papastathopoulos, J. A. Tawn and J. L. Wadsworth 813

Rejoinder

- P. Northrop and P. Jonathan* 814

Research Articles

- The role of statisticians in international science policy 817
P. Guttorp
- A first-order autoregressive model for the joint distribution of a time dependent random variable and its derivative 826
N. Mole and L. Chan
- A bivariate compound Poisson model for the occurrence of foreshock and aftershock sequences in Turkey 847
G. Özel
- Autologistic models for binary data on a lattice 857
J. Hughes, M. Haran and P. C. Caragea
- An empirical pseudo-Bayes approach to determining a weighted-summation for use in generalized linear models 872
R. T. Sabo
- Statistical inference in Lombard's smooth-change model 882
J.-F. Quessy, A.-C. Favre, M. Said and M. Champagne
- Regression estimator under inverse sampling to estimate arsenic contamination 894
M. Moradi, M. Salehi, J. A. Brown and N. Karimi
- A Horvitz–Thompson-type estimator of species richness 901
S. Magnussen
- Prior elicitation for mixed quantile regression with an allometric model 911
R. Alhamzawi, K. Yu, V. Vinciotti and A. Tucker
