Articles

- Effect of maternally supplied n-3 and n-6 oils on the fatty acid composition and mononuclear immune cell distribution of lymphatic tissue from the gastrointestinal tract of suckling piglets
Claudia Binter, Annabella Khol-Parisini, Wilhelm Gerner, Klaus Schäfer, Howard W. Hulan, Armin Saalmüller and Jürgen Zentek 341
- Effects of dietary conjugated linoleic acids on lipid metabolism and antioxidant capacity in laying hens
Xiaolong Qi, Shugeng Wu, Haijun Zhang, Hongyuan Yue, Shaohui Xu, Feng Ji and Guanghai Qi 354
- Effect of copper on antioxidant ability and nutrient metabolism in broiler chickens stimulated by lipopolysaccharides
Zhigang Song, Tong Zhao, Lei Liu, Hongchao Jiao and Hai Lin 366
- Effects of maternal folic acid supplementation on morphology and apoptosis-related gene expression in jejunum of newborn intrauterine growth retarded piglets
Jingbo Liu, Daiwen Chen, Xiangbing Mao and Bing Yu 376
- Influence of various amounts of fumaric acid on performance and parameters of the acid–base balance of growing bulls fed with grass or maize silage
Nicole Remling, Sabrina Hachenberg, Ulrich Meyer, Martin Höltershinken, Gerhard Flachowsky and Sven Dänicke 386
- Investigations on the effect of forage source, grinding, and urea supplementation on ruminal fermentation and microbial protein flow in a semi-continuous rumen simulation system
Bastian Hildebrand, Jeannette Boguhn and Markus Rodehutschord 402
