

Table of Contents

Preamble	S5
Concept and markers of low-grade inflammation	S5–S11
Chronic low-grade inflammation and insulin resistance	S11–S13
Postprandial inflammatory response	S13–S14
Ageing and low-grade inflammation	S14–S15
Exercise and low-grade inflammation	S15–S18
A consideration of different approaches to identify relationships between diet and its components and markers of chronic low-grade inflammation	S18
Dietary patterns and low-grade inflammation	S18–S28
Process-related compounds: advanced glycation end products and advanced lipoperoxidation end products	S28–S37
Macronutrients and low-grade inflammation	S37–S46
Micronutrients and phytochemicals	S46–S52
Other factors	S52–S53
Summary, conclusions and research gaps	S53–S54
Acknowledgements	S54–S55
