

CONTENTS

Research Reports

- Influence of diet and commingling on performance parameters in replacement broiler breeders following live oocyst coccidiosis vaccination**
L. Oden, D. J. Caldwell, S. Pohl, A. Klein, S. Anderson, S. Young Dougherty, C. Broussard, S. Fitz-Coy, L. Newman, and J. T. Lee 401
- The effects of tropical environmental conditions on the stress and immune responses of commercial broilers, Thai indigenous chickens, and crossbred chickens**
C. Tirawattanawanich, S. Chantakru, W. Nimitsantiwong, and S. Tongyai 409
- Comparison of growth models between artificial neural networks and nonlinear regression analysis in Cherry Valley ducks**
C. Kaewtapee, C. Khetchaturat, and C. Bunchasak 421
- Quality of meat from two 1970s and Ross 308 broiler strains fed drug-free low- and recommended-protein diets**
T. A. Woyengo, A. Golian, C. Bennett, H. Muc, G. Crow, and W. Guenter 429
- Comparison of the 3-phase segmented linear regression and artificial neural network models to predict broiler hatchability**
M. Chamsaz, A. H. Perai, S. Asadpour, and R. Hosseini Shahidi 447
- The effect of different concentrations of *Peganum harmala* seeds with or without a yeast cell wall product on the live performance, intestinal histomorphology, and weights of visceral organs of broiler chickens**
M. G. Rahbar, P. Farhoomand, and A. Kamyab 454
- Egg production forecasting: Determining efficient modeling approaches**
H. A. Ahmad 463
- Effects of broiler breeder genetic, diet type, and feeding program on maternal antibody transfer and development of lymphoid tissues in chicken progeny**
N. M. Leandro, R. Ali, M. Koci, V. Moraes, R. D. Malheiros, M. J. Wineland, and E. O. Oviedo-Rondón 474
- Digestible isoleucine-to-lysine ratio effects in diets for broilers from 4 to 6 weeks posthatch**
L. Mejia, C. D. Zumwalt, E. J. Kim, P. B. Tillman, and A. Corzo 485
- Effects of L-carnitine via in ovo injection with or without L-carnitine feed supplementation on broiler hatchability and posthatch performance**
M. Dooley, E. D. Peebles, W. Zhai, L. Mejia, C. D. Zumwalt, and A. Corzo 491
- Effect of processing on the nutritional value of common vetch (*Vicia sativa*) seed as a feed ingredient for broilers**
GH. Sadeghi, S. A. Tabeidian, and M. Toghyani 498

Effects of different dietary copper sources on laying hen performance and egg yolk cholesterol	506
A. Y. Pekel and M. Alp	
Nutritional and feeding value of crude glycerin for poultry. 2. Evaluation of feeding crude glycerin to broilers	514
B. Jung and A. B. Batal	
Effect of dietary concentrations of energy, crude protein, lysine, and methionine on the performance of White Leghorn layers in the tropics	528
S. V. Rama Rao, V. Ravindran, T. Srilatha, A. K. Panda, and M. V. L. N. Raju	
Evaluation of broiler performance and carcass yields when fed diets containing corn grain from transgenic stacked-trait product DAS-Ø15Ø7-1xDAS-59122-7xMON-ØØ81Ø-6xMON-ØØ6Ø3-6	542
J. McNaughton, M. Roberts, D. Rice, B. Smith, M. Hinds, B. Delaney, C. Iiams, and T. Sauber	
Effect of bedding type and transient wetness on footpad dermatitis in broiler chickens	554
Ö. Cengiz, J. B. Hess, and S. F. Bilgili	
Assessment of an experimental phytase enzyme product on live performance, bone mineralization, and phosphorus excretion in broiler chickens	561
A. L. Shaw, J. B. Hess, J. P. Blake, and N. E. Ward	
Forced hot air to dry feces and kill bacteria on transport cage flooring	567
M. E. Berrang, C. L. Hofacre, and R. J. Meinersmann	
Field Reports	
Serological survey of antibodies against avian metapneumovirus in Korean chicken flocks	573
J. E. Park, D. W. Lee, and H. J. Shin	
Observations of testicular abnormalities in <i>Gallus domesticus</i> males	577
J. R. Moyle, S. M. Whipple, F. D. Clark, and R. K. Bramwell	
Active surveillance of avian influenza virus in backyard birds in Egypt	584
E. F. El-Zoghby, E. M. Abdelwhab, A. Arafa, A. A. Selim, S. G. Kholousy, W. H. Kilany, M. K. Hassan, Z. El-Kanawati, M. M. Aly, and H. M. Hafez
