SPECIAL ISSUE: ENVIRONMENTAL IMPROVEMENT AND POLLUTION CONTROL BY 3R (REDUCE, REUSE AND RECYCLE) TECHNOLOGIES OF ELECTRICAL & ELECTRONIC PRODUCTS

Guest Editor: Suiran Yu

- 369 **Heavy metal leaching potential of discarded mobile phone wastes: a laboratory-based study**
Devika Bajpai, Poonam Ahluwalia and Arvind K. Nema
- 379 **Framework for eco-innovative design with application in low-voltage electric appliance industry**
Stelian Brad, Emilia Brad and Bogdan Mocan
- 397 **An integrated modularity approach for green product development**
Fanbin Kong, Xinguo Ming, Lei Wang, Pengpeng Wang, Huailiang Zuo and Lina He
- 417 **GP-based optimisation of product parameters of design alternatives to support life cycle design**
Suiran Yu
- 435 **Sparse principal component analysis based sustainability assessment of EOL ICT service infrastructures**
Bingbing Li, Hongchao Zhang, Derrick Tate, Li Ding and Lei Zhang
- 452 **Simulation research on the influence of stress relaxation on plastic IC delamination during scrapped PCB disassembly**
Danfeng Long, Dong Xiang, Yehong Dong and Guanghong Duan
- 465 **Application of FCE–AHP method for multi-criteria decision-making of municipal solid waste management alternatives: a case study in the Dalian Development Zone of China**
Jing Du, Ling Xu, Shuo Wang, Fenglin Yang, Junior B.N. Adohinzin and Sachihiko Harashina
- 485 **Computer waste management: a review on Indian initiatives**
Pamela Chawla, Neelu Jain and Deepak Bagai
- 501 **Model and solution to the product disassembly sequence planning**
Zhifeng Liu, Di Hu and Bingbing Li

- 516 **Achieving sustainability through product-service life cycle management**
*Pengpeng Wang, Xinguo Ming, Dong Li, Zhenyong Wu, Zhitao Xu
and Wenyan Song*
