## RESEARCH FRONT: ANIMAL PRODUCTION IN A CHANGING WORLD

Foreword	i
Future research priorities for animal production in a changing world <i>N. D. Scollan, P. L. Greenwood, C. J. Newbold, D. R. Yáñez Ruiz, K. J. Shingfield, R. J. Wallace and J. F. Hocquette</i>	1–5
Improving the efficiency of energy utilisation in cattle <i>C. K. Reynolds, L. A. Crompton and J. A. N. Mills</i>	6–12
Current and future issues facing red meat quality in a competitive market and how to manage continuous improvement <i>D. W. Pethick, A. J. Ball, R. G. Banks and J. F. Hocquette</i>	13–18
Enhancing fatty acid composition of milk and meat through animal feeding <i>M. Doreau, D. Bauchart and Y. Chilliard</i>	19–29
Perception in France of the Australian system for the prediction of beef quality (Meat Standards Australia) with perspectives for the European beef sector <i>J. F. Hocquette, I. Legrand, C. Jurie, D. W. Pethick and D. Micol</i>	30–36

---

## RESEARCH PAPERS

Effect of Australian sweet lupin ( <i>Lupinus angustifolius</i> L.) inclusion levels and enzyme supplementation on the performance, carcass composition and meat quality of grower/finisher pigs <i>J. C. Kim, B. P. Mullan, R. R. Nicholls and J. R. Pluske</i>	37–43
Improving the accuracy of digestibility estimates for cattle grazing tropical pastures when sampling with oesophageal fistulated cattle <i>D. B. Coates</i>	44–52
Physicochemical, microbiological and sensory properties of Sudanese yoghurt (zabadi) made from goat's milk <i>Eshraga A. Eissa, Elfadil E. Babiker and Abu ElGasim A. Yagoub</i>	53–59
Development of a software model to estimate daily greenhouse gas emissions of pasture-fed ruminant farming systems <i>J. A. Sise, J. I. Kerlake, M. J. Oliver, S. Glennie, D. Butler, M. Behrent, P. F. Fennessy and A. W. Campbell</i>	60–70
Comparison of two instruments (G2 Tenderometer and a Lloyd Texture analyser) for measuring the shear force of cooked meat <i>D. L. Hopkins, E. S. Toohey, M. J. Kerr and R. van de Ven</i>	71–76
Effect of nitrogen application on dry matter yields, nutritive characteristics and mineral content of summer-active forage crops in southern Australia <i>J. L. Jacobs and G. N. Ward</i>	77–86
