

# European Journal of Plant Pathology

Contents Volume 129 No. 2 February 2011

## Special Issue

“The Downy Mildews - Biology, Mechanisms of Resistance, Population Ecology”

Guest Editors: A. Lebeda, G.J. Holmes, B. Mauch-Mani and M.J. Jeger

## Foreword

A. Lebeda, G.J. Holmes, B. Mauch-Mani and M.J. Jeger 133

## *Biology and Evolution*

**Phylogenetic investigations in the genus *Pseudoperonospora* reveal overlooked species and cryptic diversity in the *P. cubensis* species cluster**

F. Runge, Y.-J. Choi and M. Thines 135 – 146

**Host matrix has major impact on the morphology of *Pseudoperonospora cubensis***

F. Runge and M. Thines 147 – 156

**Cucurbit downy mildew (*Pseudoperonospora cubensis*)—biology, ecology, epidemiology, host-pathogen interaction and control**

A. Lebeda and Y. Cohen 157 – 192

**Spinach: better management of downy mildew and white rust through genomics**

J.C. Correll, B.H. Bluhm, C. Feng, K. Lamour, L.J. du Toit and S.T. Koike 193 – 205

**Advances in sunflower downy mildew research**

F. Viranyi and O. Spring 207 – 220

## *Resistance mechanisms and host-parasite interactions*

**Histological responses of host and non-host plants to *Hyaloperonospora parasitica***

H. Li, X. Ge, S. Han, K. Sivasithamparam and M.J. Barbetti 221 – 232

**Distribution of race-specific resistance against *Bremia lactucae* in natural populations of *Lactuca serriola***

I. Petrželová and A. Lebeda 233 – 253

**Site-specific field resistance of grapevine to *Plasmopara viticola* correlates to altered gene expression and was not modulated by the application of organic amendments**

B. Thuerig, A. Slaughter, E. Marouf, M. Held, B. Mauch-Mani and L. Tamm 255 – 265

**Influence of nitric oxide and reactive oxygen species on development of lettuce downy mildew in *Lactuca* spp.**

M. Sedlářová, M. Petřivalský, J. Piterková, L. Luhová, J. Kočřřová and A. Lebeda 267 – 280

**Identification of genes expressed during the compatible interaction of grapevine with *Plasmopara viticola* through suppression subtractive hybridization (SSH)**

G. Legay, E. Marouf, D. Berger, J.-M. Neuhaus, B. Mauch-Mani and A. Slaughter 281 – 301

## *Population ecology and control*

**Quantitative studies on downy mildew (*Peronospora destructor* Berk. Casp.) affecting onion seed production in southern Uruguay**

P.H. González, P. Colnago, S. Peluffo, H. González Idiarte, J. Zipitřřía and G.A. Galvan 303 – 314

- Diversity and fitness of *Plasmopara viticola* isolates resistant to QoI fungicides**  
M.-F. Corio-Costet, M.-C. Dufour, J. Cigna, P. Abadie and W.-J. Chen **315–329**
- Evolution of QoI resistance in *Plasmopara viticola* oospores**  
S.L. Toffolatti, M. Prandato, L. Serrati, H. Sierotzki, U. Gisi and A. Vercesi **331–338**
- EMS and UV irradiation induce unstable resistance against CAA fungicides in *Bremia lactucae***  
A.E. Rubin, A.-C. Werdiger, M. Blum, U. Gisi, H. Sierotzki, D. Hermann and Y. Cohen **339–351**
- Influence of dosage, storage time and temperature on efficacy of metalaxyl-treated seed for the control of pearl millet downy mildew**  
R.P. Thakur, V.P. Rao and R. Sharma **353–359**
