

Volume 56, Issue 3, March 2011

CONTENTS

- 209 A screening strategy of fungal biocontrol agents towards *Verticillium* wilt of cotton
Y. Zheng, Q.-Y. Xue, L.-L. Xu, Q. Xu, S. Lu, C. Gu, J.-H. Guo
- 217 Efficacy assessment of *Pichia guilliermondii* strain Z1, a new biocontrol agent, against citrus blue mould in Morocco under the influence of temperature and relative humidity
Rachid Lahlali, Younes Hamadi, M. El guilli, M. Haissam Jijakli
- 225 Suitability of some farmscaping plants as nectar sources for the parasitoid wasp, *Microplitis croceipes* (Hymenoptera: Braconidae): Effects on longevity and body nutrients
Timothy D. Nafziger Jr., Henry Y. Fadamiro
- 230 The host range and impact of *Bikasha collaris* (Coleoptera: Chrysomelidae), a promising candidate agent for biological control of Chinese tallow, *Triadica sebifera* (Euphorbiaceae) in the United States
Wei Huang, Gregory S. Wheeler, Matthew F. Purcell, Jianqing Ding
- 239 Insecticidal activity influence of 20-Hydroxyecdysone on the pathogenicity of *Isaria fumosorosea* against *Plutella xylostella*
Di Xu, Shaukat Ali, Zhen Huang
- 245 Molecular identification of predation by carabid beetles on exotic and native slugs in a strawberry agroecosystem
Michael J. Eskelson, Eric G. Chapman, Douglas D. Archbold, John J. Obrycki, James D. Harwood
- 254 Prioritizing areas in the native range of hygrophila for surveys to collect biological control agents
Abhishek Mukherjee, Mary C. Christman, William A. Overholt, James P. Cuda
- 263 Modeling horizontal transmission of microsporidia infecting gypsy moth, *Lymantria dispar* (L.), larvae
Dörte Goertz, Gernot Hoch
- 271 Entomopathogenic fungi (Hypocreales) for control of potato psyllid, *Bactericera cockerelli* (Šulc) (Hemiptera: Triozidae) in an area endemic for zebra chip disease of potato
L.A. Lacey, T.-X. Liu, J.L. Buchman, J.E. Munyaneza, J.A. Goolsby, D.R. Horton
