

Research Papers

- Potential of dry fractionation of wheat bran for the development of food ingredients, part I: Influence of ultra-fine grinding**
Y. Hemery, M. Chaurand, U. Holopainen, A.-M. Lampi, P. Lehtinen, V. Piironen, A. Sadoudi and X. Rouau 1
- Potential of dry fractionation of wheat bran for the development of food ingredients, part II: Electrostatic separation of particles**
Y. Hemery, U. Holopainen, A.-M. Lampi, P. Lehtinen, T. Nurmi, V. Piironen, M. Edelmann and X. Rouau 9
- Effects of glycerol on water properties and steaming performance of prefermented frozen dough**
L. Huang, J. Wan, W. Huang, P. Rayas-Duarte and G. Liu 19
- Effects of roasting on barley β -glucan, thermal, textural and pasting properties**
P. Sharma, H.S. Gujral and C.M. Rosell 25
- Water mobility, rheological and textural properties of rice starch gel**
S. Lu, J.-J. Chen, Y.-K. Chen, C.-y. Lii, P. Lai and H.-H. Chen 31
- Inheritance of flour paste viscosity is associated with a rice *Waxy* gene exon 10 SNP marker**
K. Traore, A.M. McClung, M.-H. Chen and R. Fjellstrom 37
- Extraction and characterization of water-extractable and water-unextractable arabinoxylans from spelt bran: Study of the hydrolysis conditions for monosaccharides analysis**
E. Escarnot, M. Agedo, R. Agneessens, B. Wathelet and M. Paquot 45
- In vitro fermentation kinetics and end-products of cereal arabinoxylans and (1,3;1,4)- β -glucans by porcine faeces**
B.A. Williams, D. Mikkelsen, L. le Paih and M.J. Gidley 53
- Genetic variants of *HvGlb1* in Tibetan annual wild barley and cultivated barley and their correlation with malt quality**
X. Jin, S. Cai, Y. Han, J. Wang, K. Wei and G. Zhang 59
- Impact of genetic and environmental factors on einkorn wheat (*Triticum monococcum* L. subsp. *monococcum*) polysaccharides**
A. Brandolini, A. Hidalgo, L. Plizzari and D. Erba 65
- Inhibitory effect of whole oat on aberrant crypt foci formation and colon tumor growth in ICR and BALB/c mice**
H.-C. Wang, C.-H. Hung, J.-D. Hsu, M.-Y. Yang, S.-J. Wang and C.-J. Wang 73
- Magnetically modified spent grain for dye removal**
I. Safarik, K. Horska and M. Safarikova 78
- Sensory texture of cooked rice is rather linked to chemical than to physical characteristics of raw grain**
C. Mestres, F. Ribeyre, B. Pons, V. Fallet and F. Matencio 81
- Polyphenol composition and "in vitro" antiradical activity of single and multigrain breads**
A. Angioloni and C. Collar 90
- Staling of frozen partly and fully baked breads. Study of the combined effect of amylopectin recrystallization and water content on bread firmness**
F. Ronda, P.A. Caballero, J. Quilez and Y.H. Roos 97
- Waxy endosperm accompanies increased fat and saccharide contents in bread wheat (*Triticum aestivum* L.) grain**
T. Yasui and K. Ashida 104

(contents continued from outside back cover)

Puroindolines, Pin alleles, hordoindolines and grain softness proteins are sources of bactericidal and fungicidal peptides	
<i>R.L. Phillips, E.A. Palombo, J.F. Panozzo and M. Bhave</i>	112
Improved nitrogen status enhances zinc and iron concentrations both in the whole grain and the endosperm fraction of wheat	
<i>U.B. Kutman, B. Yildiz and I. Cakmak</i>	118
Experimental data and modeling of the thermodynamic properties of bread dough at refrigeration and freezing temperatures	
<i>T.G. Matuda, P.A. Pessôa Filho and C.C. Tadini</i>	126
A novel method to prepare gluten-free dough using a meso-structured whey protein particle system	
<i>L.E. van Riemsdijk, P.J.M. Pelgrom, A.J. van der Goot, R.M. Boom and R.J. Hamer</i>	133
Rheological and thermal properties of masa as related to changes in corn protein during nixtamalization	
<i>A.Q. Guzmán, M.E. Jaramillo Flores, J.S. Feria, M.G. Méndez Montealvo and Y.-J. Wang</i>	139
Calendar	I
