

Research Papers

- 99 *P Neve, J K Norsworthy, K L Smith & I A Zelaya* Modelling evolution and management of glyphosate resistance in *Amaranthus palmeri*
- 113 *K Hamouzová, J Soukup, M Jursík, P Hamouz, V Venclová & P Tůmová* Cross-resistance to three frequently used sulfonylurea herbicides in populations of *Apera spica-venti* from the Czech Republic
- 123 *M J Owen, P J Michael, M Renton, K J Steadman & S B Powles* Towards large-scale prediction of *Lolium rigidum* emergence. I. Can climate be used to predict dormancy parameters?
- 133 *M J Owen, P J Michael, M Renton, K J Steadman & S B Powles* Towards large-scale prediction of *Lolium rigidum* emergence. II. Correlation between dormancy and herbicide resistance levels suggests an impact of cropping systems
- 142 *S Anbari, A Lundkvist & T Verwijst* Sprouting and shoot development of *Sonchus arvensis* in relation to initial root size
- 151 *M I Rodríguez-Ojeda, L Velasco, L C Alonso, J Fernández-Escobar & B Pérez-Vich* Inheritance of the unpigmented plant trait in *Orobanche cumana*
- 157 *P R Westerman, C D Luijendijk, J D A Wevers & W Van Der Werf* Weed seed predation in a phenologically late crop
- 165 *K Roos, H G Rödel & E Beck* Short- and long-term effects of weed control on pastures infested with *Pteridium arachnoideum* and an attempt to regenerate abandoned pastures in South Ecuador
- 177 *H M Kruidhof, E R Gallandt, E R Haramoto & L Bastiaans* Selective weed suppression by cover crop residues: effects of seed mass and timing of species' sensitivity
- 187 *A C Grundy, A Mead, W Bond, G Clark & S Burston* The impact of herbicide management on long-term changes in the diversity and species composition of weed populations
- 201 *T Hyvönen, M Glemnitz, L Radics & J Hoffmann* Impact of climate and land use type on the distribution of Finnish casual arable weeds in Europe
