|--|---------|
| Modelling long-term fire regimes of southern California shrublands <i>Seth H. Peterson, Max A. Moritz, Marco E. Morais, Philip E. Dennison and Jean M. Carlson</i> | 1–16 |
| Emissions of air pollutants by Canadian wildfires from 2000 to 2004 <i>David Lavoué and Brian J. Stocks</i> | 17–34 |
| Effects of fire frequency on prescribed fire behaviour and soil temperatures in dry dipterocarp forests <i>Kobsak Wanthongchai, Johann G. Goldammer and Jürgen Bauhus</i> | 35–45 |
| On the comparative importance of fire danger rating indices and their integration with spatial and temporal variables for predicting daily human-caused fire occurrences in Spain <i>M. Padilla and C. Vega-García</i> | 46–58 |
| Allocating fuel breaks to optimally protect structures in the wildland–urban interface <i>Avi Bar Massada, Volker C. Radeloff and Susan I. Stewart</i> | 59–68 |
| Relationships between landscape patterns and fire occurrence within a successional gradient in sagebrush steppe–juniper woodland <i>Aaron D. Roth, Stephen C. Bunting and Eva K. Strand</i> | 69–77 |
| Built structure identification in wildland fire decision support <i>David E. Calkin, Jon D. Rieck, Kevin D. Hyde and Jeffrey D. Kaiden</i> | 78–90 |
| A North American regional reanalysis climatology of the Haines Index <i>Wei Lu, Joseph J. Charney, Sharon Zhong, Xindi Bian and Shuhua Liu</i> | 91–103 |
| Effectiveness of three post-fire treatments at reducing soil erosion in Galicia (NW Spain) <i>Cristina Fernández, José A. Vega, Enrique Jiménez and Teresa Fonturbel</i> | 104–114 |
| Career stages in wildland firefighting: implications for voice in risky situations <i>Alexis Lewis, Troy E. Hall and Anne Black</i> | 115–124 |
| Late Holocene geomorphic record of fire in ponderosa pine and mixed-conifer forests, Kendrick Mountain, northern Arizona, USA <i>Sara E. Jenkins, Carolyn Hull Sieg, Diana E. Anderson, Darrell S. Kaufman and Philip A. Pearthree</i> | 125–141 |
| Quantifying the influence of fuel age and weather on the annual extent of unplanned fires in the Sydney region of Australia <i>Owen F. Price and Ross A. Bradstock</i> | 142–151 |
| Emission of biogenic volatile organic compounds involved in eruptive fire: implications for the safety of firefighters <i>Toussaint Barboni, Magali Cannac, Eric Leoni and Nathalie Chiaramonti</i> | 152–161 |
