

# CONTENTS

VOLUME 22, ISSUE No. 2

March 2011

Spatial prediction in the presence of positional error <i>T. R. Fanshawe and P. J. Diggle</i>	109
Discussions	
<i>C. M. Crainiceanu</i>	123
<i>N. Cressie</i>	125
<i>F. Lindgren, T. Martins, H. Rue and D. Simpson</i>	127
<i>A. E. Gelfand and S. Banerjee</i>	128
Rejoinder	129
<i>T. R. Fanshawe and P. J. Diggle</i>	
A robust algorithm for the sequential linear analysis of environmental radiological data with imprecise observations <i>C. Rivero and T. Valdes</i>	132
Modelling species abundance using the Poisson–Tweedie family <i>A. H. El-Shaarawi, R. Zhu and H. Joe</i>	152
Multiplicative factor analysis with a latent mixed model structure for air pollution exposure assessment <i>M. C. Nikolov, B. A. Coull, P. J. Catalano and J. J. Godleski</i>	165
K-scan for anomaly detection in disease surveillance <i>J. M. Loh</i>	179
A hierarchical Bayesian spatio-temporal model for extreme precipitation events <i>S. Ghosh and B. K. Mallick</i>	192
Validation and inter-comparison of three methodologies for interpolating daily precipitation and temperature across Canada <i>N. K. Newlands, A. Davidson, A. Howard and H. Hill</i>	205
A general class of nonseparable space–time covariance models <i>T. C. O. Fonseca and M. F. J. Steel</i>	224
