

(Abstracted/Indexed in: AGI's Bibliography and Index of Geology; Biological Abstracts; Biosis; Bulletin Signalétique; Chemical Abstracts/CAS; Current Contents/Agriculture, Biology & Environmental Sciences; Elsevier BIOBASE/Current Awareness in Biological Sciences; Environmental Periodicals Bibliography; Embiology; GEOBASE; Irrigation, Drainage Abstracts; PASCAL; Science Citation Index; SciSearch; Soils and Fertilizers). Also covered in the abstract and citation database Scopus®. Full text available on ScienceDirect®.

Review

The use of remote sensing in soil and terrain mapping – A review

V.L. Mulder, S. de Bruin, M.E. Schaepman and T.R. Mayr 1

Research papers

The influence of soil properties on the individual and competitive sorption and desorption of Cu and Cd

B. Cerqueira, E.F. Covelo, L. Andrade and F.A. Vega 20

Improvement of soil structure formation by degradation of coarse organic matter

C. Grosbellet, L. Vidal-Beaudet, V. Caubel and S. Charpentier 27

Soil genesis, morphodynamic processes and chronological implications in two soil transects of SE Sardinia, Italy:

Traditional pedological study coupled with laser ablation ICP-MS and radionuclide analyses

F. Scarciglia, P. Tuccimei, A. Vacca, D. Barca, I. Pulice, R. Salzano and M. Soligo 39

Modelling the complexation of Cd in soil solution at different temperatures using the UV-absorbance of dissolved organic matter

J.Y. Cornu, A. Schneider, K. Jezequel and L. Denaix 65

Distribution of chemical elements in an old metallurgical area, Zenica (Bosnia and Herzegovina)

A. Jasminka and Š. Robert 71

Effects of the fabric on the relationship between aggregate stability and color in a Regosol–Umbrisol soilscape

M. Sánchez-Marañón, J.M. Martín-García and R. Delgado 86

Evaluating pore structures of soil components with a combination of “conventional” and hyperpolarised ¹²⁹Xe NMR studies

S. Filimonova, A. Nossov, A. Dümig, A. Gédéon, I. Kögel-Knabner and H. Knicker 96

Three-dimensional mapping of soil organic matter content using soil type–specific depth functions

B. Kempen, D.J. Brus and J.J. Stoorvogel 107

Using X-ray tomography to quantify earthworm bioturbation non-destructively in repacked soil cores

Y. Capowiez, S. Sammartino and E. Michel 124

Humic acid model substances with pronounced redox functionality for the study of environmentally relevant interaction processes of metal ions in the presence of humic acid

S. Sachs and G. Bernhard 132

Testing different approaches to characterize Burundian soils by the BEST procedure

V. Bagarello, S. Di Prima, M. Iovino, G. Provenzano and A. Sgroi 141

Mapping depth-to-clay using fitted multiple depth response curves of a proximal EMI sensor

T. Saey, M. Van Meirvenne, P. De Smedt, L. Cockx, E. Meerschman, M.M. Islam and F. Meeuws 151

(continued from back cover)

Mineralogical and physico-chemical properties of Ferralic Arenosols derived from unconsolidated Plio-Pleistocenic deposits in the coastal plains of Congo L. Mareschal, J.D.D. Nzila, M.P. Turpault, A. Thongo M'Bou, J.C. Mazoumbou, J.P. Bouillet, J. Ranger and J.P. Laclau	159
A study on the air permeability as affected by compression of three French soils A.M. Tang, Y.-J. Cui, G. Richard and P. Défossez	171
Effect of nitrogen fertilization on soil CH ₄ and N ₂ O fluxes, and soil and bole respiration R.S. Jassal, T.A. Black, R. Roy and G. Ethier	182
Geology and climate conditions affect more humus forms than forest canopies at large scale in temperate forests J.-F. Ponge, B. Jabiol and J.-C. Gégout	187
Self-restoration of post-agrogenic chernozems of Russia: Soil development, carbon stocks, and dynamics of carbon pools O. Kalinina, S.-E. Krause, S.V. Goryachkin, N.A. Karavaeva, D.I. Lyuri and L. Giani	196
Application of biochemical degradation indices to the microbial decomposition of maize leaves and wheat straw in soils under different tillage systems A. Jacobs, K. Kaiser, B. Ludwig, R. Rauber and R.G. Joergensen	207
Microbial and soil properties in bentgrass putting greens: Impacts of nitrogen fertilization rates Y. Liu, E. Dell, H. Yao, T. Ruffy and W. Shi	215
