

INTERNATIONAL JOURNAL OF Food Microbiology

Volume 145, Supplement 1, 2011

CONTENTS

Special Issue:

Improved biotraceability of unintended microorganisms and their substances in food and feed chains

Introduction

J. Hoorfar, M. Wagner, K. Jordan, S.L. Bouquin and J. Skiby (Denmark, Austria, Ireland)
Towards biotracing in food chains

S1

Feed

J. Zentek (Germany)
Feed for food

S5

C. Binter, J.M. Straver, P. Häggblom, G. Bruggeman, P.-A. Lindqvist, J. Zentek and M.G. Andersson (Austria, The Netherlands, Sweden, Belgium, Germany)

Transmission and control of *Salmonella* in the pig feed chain: A conceptual model

S7

S. Koyuncu, G. Andersson, P. Vos and P. Häggblom (Sweden, The Netherlands)

DNA microarray for tracing *Salmonella* in the feed chain

S18

Dairy

P.N. Skandamis (Greece)

Advancements of biotracing in the dairy chain

S23

M. Fricker, B. Skånseng, K. Rudi, B. Stessl and M. Ehling-Schulz (Austria, Norway)

Shift from farm to dairy tank milk microbiota revealed by a polyphasic approach is independent from geographical origin

S24

M.S. Schwartzman, A. Maffre, F. Tenenhaus-Aziza, M. Sanaa, F. Butler and K. Jordan (Ireland, France)

Modelling the fate of *Listeria monocytogenes* during manufacture and ripening of smeared cheese made with pasteurised or raw milk

S31

E. Fox, K. Hunt, M. O'Brien and K. Jordan (Ireland)

Listeria monocytogenes in Irish Farmhouse cheese processing environments

S39

C.-E.A. Belessi, A.S. Gounadaki, A.N. Psomas and P.N. Skandamis (Greece)

Efficiency of different sanitation methods on *Listeria monocytogenes* biofilms formed under various environmental conditions

S46

C.-E.A. Belessi, A.S. Gounadaki, S. Schwartzman, K. Jordan and P.N. Skandamis (Greece, Ireland)

Evaluation of growth/no growth interface of *Listeria monocytogenes* growing on stainless steel surfaces, detached from biofilms or in suspension, in response to pH and NaCl

S53

I. Aprodu, G. Walcher, J. Schelin, I. Hein, B. Norling, P. Rådström, A. Nicolau and M. Wagner (Romania, Austria, Sweden)

Advanced sample preparation for the molecular quantification of *Staphylococcus aureus* in artificially and naturally contaminated milk

S61

Pork

A. Pielat (Netherlands)

The data supply chain for tracing *Salmonella* in pork production

S66

H.J.M. Aarts, P. Vos, J.T. Larsson, A.H.A.M. van Hoek, S. Huehn, T. Weijers, H.A. Grønlund and B. Malorny (the Netherlands, Denmark, Germany)

A multiplex ligation detection assay for the characterization of *Salmonella enterica* strains

S68

H. Grønlund, L. Riber, H. Vigre, C. Löfström, L. Folling, S. Huehn, B. Malorny, P. Rådström, K. Rudi and J. Hoorfar (Denmark, Germany, Sweden, Norway)

Microarray-based genotyping of *Salmonella*: Inter-laboratory evaluation of reproducibility and standardization potential

S79

N. Krämer, C. Löfström, H. Vigre, J. Hoorfar, C. Bunge and B. Malorny (Germany, Denmark)

A novel strategy to obtain quantitative data for modelling: Combined enrichment and real-time PCR for enumeration of salmonellae from pig carcasses

S86

(Contents continued on next page)

(Contents continued)

- C. Pin, G. Avendaño-Perez, E. Cosciani-Cunico, N. Gómez, A. Gounadakis, G.-J. Nychas, P. Skandamis and G. Barker (United Kingdom, Italy, Greece)
Modelling *Salmonella* concentration throughout the pork supply chain by considering growth and survival in fluctuating conditions of temperature, pH and a_w S96
- C. Löfström, J. Schelin, B. Norling, H. Vigre, J. Hoorfar and P. Rådström (Denmark, Sweden)
Culture-independent quantification of *Salmonella enterica* in carcass gauze swabs by flotation prior to real-time PCR S103
- Poultry**
- H. Ingmer (Denmark)
Challenges of *Campylobacter jejuni* in poultry production S110
- M. Ligowska, M.T. Cohn, R.A. Stabler, B.W. Wren and L. Brøndsted (Denmark, United Kingdom)
Effect of chicken meat environment on gene expression of *Campylobacter jejuni* and its relevance to survival in food S111
- E. Kudirkienė, J. Bunevičiene, L. Brøndsted, H. Ingmer, J.E. Olsen and M. Malakauskas (Lithuania, Denmark)
Evidence of broiler meat contamination with post-disinfection strains of *Campylobacter jejuni* from slaughterhouse S116
- Bio-terror**
- R. Knutsson (Sweden)
A tracing tool portfolio to detect *Bacillus anthracis*, *Clostridium botulinum* and Noroviruses: Bioterrorism is a food safety and security issue S121
- R. Knutsson, B. van Rotterdam, P. Fach, D. De Medici, M. Fricker, C. Löfström, J. Ågren, B. Segerman, G. Andersson, P. Wielinga, L. Fenicia, J. Skiby, A.C. Schultz and M. Ehling-Schulz (Sweden, The Netherlands, France, Italy, Austria, Denmark)
Accidental and deliberate microbiological contamination in the feed and food chains – How biotraceability may improve the response to bioterrorism S123
- M. Fricker, J. Ågren, B. Segerman, R. Knutsson and M. Ehling-Schulz (Austria, Sweden)
Evaluation of *Bacillus* strains as model systems for the work on *Bacillus anthracis* spores S129
- P.R. Wielinga, R.A. Hamidjaja, J. Ågren, R. Knutsson, B. Segerman, M. Fricker, M. Ehling-Schulz, A. de Groot, J. Burton, T. Brooks, I. Janse and B. van Rotterdam (The Netherlands, Sweden, Austria, United Kingdom)
A multiplex real-time PCR for identifying and differentiating *B. anthracis* virulent types S137
- P. Fach, L. Fenicia, R. Knutsson, P.R. Wielinga, F. Anniballi, E. Delibato, B. Auricchio, C. Woudstra, J. Ågren, B. Segerman, D. de Medici and B.J. van Rotterdam (France, Italy, Sweden, The Netherlands)
An innovative molecular detection tool for tracking and tracing *Clostridium botulinum* types A, B, E, F and other botulinum neurotoxin producing Clostridia based on the GeneDisc cyclor S145
- L. Fenicia, P. Fach, B.J. van Rotterdam, F. Anniballi, B. Segerman, B. Auricchio, E. Delibato, R.A. Hamidjaja, P.R. Wielinga, C. Woudstra, J. Ågren, D. De Medici and R. Knutsson (Italy, France, The Netherlands, Sweden)
Towards an international standard for detection and typing botulinum neurotoxin-producing Clostridia types A, B, E and F in food, feed and environmental samples: A European ring trial study to evaluate a real-time PCR assay S152
- A.C. Schultz, S. Perelle, S. Di Pasquale, K. Kovac, D. De Medici, P. Fach, H.M. Sommer and J. Hoorfar (Denmark, France, Italy, Slovenia)
Collaborative validation of a rapid method for efficient virus concentration in bottled water S158
- B. Segerman, D. De Medici, M. Ehling Schulz, P. Fach, L. Fenicia, M. Fricker, P. Wielinga, B. Van Rotterdam and R. Knutsson (Sweden, Austria, The Netherlands, Italy, France)
Bioinformatic tools for using whole genome sequencing as a rapid high resolution diagnostic typing tool when tracing bioterror organisms in the food and feed chain S167
