

CONTENTS

Regular Papers

- Effects of ethylene degreening on the transcriptome of mandarin flesh
L. Mayuoni, M. Sharabi-Schwager (Bet-Dagan, Israel), E. Feldmesser (Rehovot, Israel) and R. Porat (Bet-Dagan, Israel) 75
- Ripening delay of mid-climacteric avocado fruit in response to elevated doses of 1-methylcyclopropene and hypoxia-mediated reduction in internal ethylene concentration
Z. Zhang, D.J. Huber and J. Rao (Gainesville, FL, USA) 83
- Effects of postharvest potassium silicate application on phenolics and other anti-oxidant systems aligned to avocado fruit quality
S.Z. Tesfay, I. Bertling and J.P. Bower (Pietermaritzburg, South Africa) 92
- Cell wall modifications during softening in melting type peach "Akatsuki" and non-melting type peach "Mochizuki"
H. Yoshioka, H. Hayama, M. Tatsuki and Y. Nakamura (Ibaraki, Japan) 100
- Chilling and heating may regulate C6 volatile aroma production by different mechanisms in tomato (*Solanum lycopersicum*) fruit
J. Bai, E.A. Baldwin (Winter Haven, FL, USA), Y. Imahori (Osaka, Japan), I. Kostenyuk, J. Burns (Lake Alfred, FL, USA) and J.K. Brecht (Gainesville, FL, USA) 111
- Conditioning temperature and harvest maturity influence induction of ripening capacity in 'd'Anjou' pear fruit
D. Sugar (Medford, OR, USA) and T.C. Einhorn (Hood River, OR, USA) 121
- Responses of 'd'Anjou' pear (*Pyrus communis* L.) fruit to storage at low oxygen setpoints determined by monitoring fruit chlorophyll fluorescence
J.P. Mattheis and D. Rudell (Wenatchee, WA, USA) 125
- Testing of a local approach for the prediction of quality parameters in intact nectarines using a portable NIRS instrument
M.-T. Sánchez, M.-J. De la Haba, J.-E. Guerrero, A. Garrido-Varo and D. Pérez-Marín (Cordoba, Spain) 130
- Acetyl salicylic acid alleviates chilling injury and maintains nutritive and bioactive compounds and antioxidant activity during postharvest storage of pomegranates
M. Sayyari (Ilam, Iran), S. Castillo, D. Valero, H.M. Díaz-Mula and M. Serrano (Alicante, Spain) 136
- Transcriptional activation of a pectate lyase gene, *RbPel1*, during petal abscission in rose
A.P. Singh, S.P. Pandey, Rajluxmi, S. Pandey, P. Nath and A.P. Sane (Lucknow, India) 143
- Inhibitors of oxidative enzymes affect water uptake and vase life of cut *Acacia holosericea* and *Chamelaucium uncinatum* stems
F.G. Çelikel (Gatton, Australia and Samsun, Turkey), D.C. Joyce and J.D. Faragher (Gatton, Australia) 149
- Low soil water content during growth contributes to preservation of green colour and bioactive compounds of cold-stored broccoli (*Brassica oleraceae* L.) florets
S.L.P. Cogo, F.C. Chaves, M.A. Schirmer, R.C. Zambiasi, L. Nora, J.A. Silva and C.V. Rombaldi (Pelotas, Brazil) 158
- Integrated control of blue mould using new fungicides and biocontrol yeasts lowers levels of fungicide residues and patulin contamination in apples
G. Lima, R. Castoria, F. De Curtis (Campobasso, Italy), A. Raiola, A. Ritieni (Napoli, Italy) and V. De Cicco (Campobasso, Italy) 164
- Errata*
- Corrigendum to "γ-Aminobutyric acid (GABA) accumulation in four strawberry cultivars in response to elevated CO₂ storage"
[Postharvest Biol. Technol. 57(2010) 92–96]
R. Deewatthanawong, J.F. Nock, C.B. Watkins (Ithaca, NY, USA) 173
- Erratum to "Robust prediction models for quality parameters in Japanese plums (*Prunus salicina* L.) using NIR spectroscopy"
[Postharvest Biol. Technol. 58 (2010) 176–184]
E.D. Louw and K.I. Theron (Matieland, South Africa) 174
