

**Commentaries**

- Landscape age and soil fertility, climatic stability, and fire regime predictability: beyond the OCBIL framework**  
L. Mucina · G.W. Wardell-Johnson 1–23
- Can hydraulic redistribution put bread on our table?**  
S.S.O. Burgess 25–29
- Hyperaccumulation of trace elements: from uptake and tolerance mechanisms to litter decomposition; selenium as an example**  
J. Barceló · C. Poschenrieder 31–35
- Erratum to: Hyperaccumulation of trace elements: from uptake and tolerance mechanisms to litter decomposition; selenium as an example**  
J. Barceló · C. Poschenrieder 37

**Regular Articles**

- Applying hydraulic lift in an agroecosystem: forage plants with shoots removed supply water to neighboring vegetable crops**  
N. Sekiya · H. Araki · K. Yano 39–50
- Enhanced decomposition of selenium hyperaccumulator litter in a seleniferous habitat—evidence for specialist decomposers?**  
C.F. Quinn · K.A. Wyant · A.L. Wangeline · J. Shulman · M.L. Galeas · J.R. Valdez · J.R. Self · M.W. Paschke · E.A.H. Pilon-Smits 51–61
- Microbial communities in sugarcane field soils with and without a sugarcane cropping history**  
C.F. Savario · J.W. Hoy 63–73
- Shovelomics: high throughput phenotyping of maize (*Zea mays* L.) root architecture in the field**  
S. Trachsel · S.M. Kaeppler · K.M. Brown · J.P. Lynch 75–87
- Kinetics of zinc release from ground tire rubber and rubber ash in a calcareous soil as alternatives to Zn fertilizers**  
S. Taheri · A.H. Khoshgoftarmanesh · H. Shariatmadari · R.L. Chaney 89–97
- Accumulation of ions during seed development under controlled saline conditions of two *Suaeda salsa* populations is related to their adaptation to saline environments**  
X. Li · X. Zhang · J. Song · H. Fan · G. Feng · B. Wang 99–107
- Long term fertilization effects on soil organic carbon pools in a sandy loam soil of the Indian sub-Himalayas**  
R. Bhattacharyya · S. Kundu · A.K. Srivastva · H.S. Gupta · V. Prakash · J.C. Bhatt 109–124
- Linking N-driven biodiversity changes with soil N availability in a Mediterranean ecosystem**  
T. Dias · S. Malveiro · M.A. Martins-Loução · L.J. Sheppard · C. Cruz 125–136
- Cumulative effects of catch crops on nitrogen uptake, leaching and net mineralization**  
J. Constantin · N. Beaudoin · F. Laurent · J.-P. Cohan · F. Duyme · B. Mary 137–154
- Glucosinolate content and nematicidal activity of Brazilian wild mustard tissues against *Meloidogyne incognita* in tomato**  
R.D.L. Oliveira · O.D. Dhingra · A.O. Lima · G.N. Jham · M.A. Berhow · R.K. Holloway · S.F. Vaughn 155–164
- European corn borer injury effects on lignin, carbon and nitrogen in corn tissues**  
S.F. Yanni · J.K. Whalen · B.-L. Ma · Y. Gelinias 165–177

<b>Nitrogen recoveries from organic amendments in crop and soil assessed by isotope techniques under tropical field conditions</b> S. Douxchamps · E. Frossard · S.M. Bernasconi · R. van der Hoek · A. Schmidt · I.M. Rao · A. Oberson	179–192
<b>In situ stabilization of metals (Cu, Cd, and Zn) in contaminated soils in the region of Bolnisi, Georgia</b> T. Hanauer · P. Felix-Henningsen · D. Steffens · B. Kalandadze · L. Navrozashvili · T. Urushadze	193–208
<b>Dual benefit from a belowground symbiosis: nitrogen fixing rhizobia promote growth and defense against a specialist herbivore in a cyanogenic plant</b> S. Thamer · M. Schädler · D. Bonte · D.J. Ballhorn	209–219
<b>Monitoring of root growth and redox conditions in paddy soil rhizotrons by redox electrodes and image analysis</b> H. Schmidt · T. Eickhorst · R. Tippkötter	221–232
<b>A one-dimensional model of water flow in soil-plant systems based on plant architecture</b> M. Janott · S. Gayler · A. Gessler · M. Javaux · C. Klier · E. Priesack	233–256
<b>Dynamics of vegetation and soil carbon and nitrogen accumulation over 26 years under controlled grazing in a desert shrubland</b> Z.-Y. Zhou · F.-R. Li · S.-K. Chen · H.-R. Zhang · G. Li	257–268
<b>The influence of black locust (<i>Robinia pseudoacacia</i>) flower and leaf fall on soil phosphate</b> Y.C. Lee · J.M. Nam · J.G. Kim	269–277
<b>Rhizosphere disturbance influences fungal colonization and community development on dead fine roots</b> M.C. Fisk · T.J. Fahey · J.H. Sobieraj · A.C. Staniec · T.O. Crist	279–293
<b>Nitrogen and phosphorus retranslocation and N:P ratios of litterfall in three tropical plantations: luxurious N and efficient P use by <i>Acacia mangium</i></b> M. Inagaki · K. Kamo · K. Miyamoto · J. Titin · L. Jamalung · J. Lapongan · S. Miura	295–307
<b>Diagnosing P status and P requirement of tea (<i>Camellia sinensis</i> L.) by leaf and soil analysis</b> A. Debnath · N.J. Barrow · D. Ghosh · H. Malakar	309–319
<b>The effect of forest soil and community composition on ectomycorrhizal colonization and seedling growth</b> M.J. O'Brien · C.E. Gomola · T.R. Horton	321–331
<b>N<sub>2</sub> fixation and performance of 12 legume species in a 6-year grassland biodiversity experiment</b> C. Roscher · S. Thein · A. Weigelt · V.M. Temperton · N. Buchmann · E.-D. Schulze	333–348
<b>Organic matter losses from temperate ombrotrophic peatlands: an evaluation of the ash residue method</b> J. Leifeld · L. Gubler · A. Grünig	349–361
<b>Phosphorus saturation and pH differentially regulate the efficiency of organic acid anion-mediated P solubilization mechanisms in soil</b> E. Oburger · D.L. Jones · W.W. Wenzel	363–382
<b>Allelopathic potential of <i>Artemisia frigida</i> and successional changes of plant communities in the northern China steppe</b> X.F. Li · J. Wang · D. Huang · L.X. Wang · K. Wang	383–398
<b>Seasonal water use patterns of woody species growing on the continuous dolostone outcrops and nearby thin soils in subtropical China</b> Y.-p. Nie · H.-s. Chen · K.-l. Wang · W. Tan · P.-y. Deng · J. Yang	399–412
<b>Developing of a simple method for screening soybean seedling cadmium accumulation to select soybean genotypes with low seed cadmium</b> M. Sugiyama · N. Ae · M. Hajika	413–422
