

CONTENTS

R.T. GAHUKAR: Use of neem and plant-based biopesticides in floriculture: current challenges and perspectives – a review	203–209
TAKASHI SUZUKI, TOMOO MAEDA, SHUKO NOMURA, MASAHIKO SUZUKI, GORDON GRANT and PETER SPORNS: Rapid analysis of fructans and comparison of fructan profiles in several different types of asparagus storage roots using MALDI-TOF MS	210–216
A.R. LEVA and R. PETRUCCELLI: Dwarf olive trees for ornamental use: a morphological evaluation	217–220
Q. YANG, Y. FU, Y.Q. WANG, Q.X. DENG, L. TAO, J. YAN and N. LUO: Effects of simulated rain on pollen-stigma adhesion and fertilisation in loquat (<i>Eriobotrya japonica</i> Lindl.).. .. .	221–224
J.X. EYRE, D.C. JOYCE and D.E. IRVING: Post-harvest browning syndrome and other qualities and defects in <i>Backhousia myrtifolia</i>	225–229
ANURADHA UPADHYAY, LALITKUMAR B. AHER and GAUDAR SHIVSHANKAR KARIBASAPPA: Detection of variation among clonal selections of grapevine (<i>Vitis vinifera</i> L.) ‘Kishmish Chernyi’ by AFLP analysis	230–234
YAN PENG and LINCHUN MAO: Salicylic acid, ethephon and methyl jasmonate induce the expression of phospholipase D in mechanically-wounded cucumber	235–240
HIROSHI IWANAMI, SHIGEKI MORIYA, KAZUMA OKADA and KAZUYUKI ABE: Effects of temperature and solar radiation on sap flow in dwarfing apple rootstocks	241–244
ROBERT PRANGE, JOHN DELONG, DOUG NICHOLS and PETER HARRISON: Effect of fruit maturity on the incidence of bitter pit, senescent breakdown, and other post-harvest disorders in ‘Honeycrisp’™ apple	245–248
MOSTAFA M. RADY: Effects on growth, yield, and fruit quality in tomato (<i>Lycopersicon esculentum</i> Mill.) using a mixture of potassium humate and farmyard manure as an alternative to mineral-N fertiliser	249–254
L. CONTADOR, P. RUBIO, P. SHINYA, C. MENESES, A. PEÑA-NEIRA and R. INFANTE: Phenolics contents and sensory characterisation of melting and non-melting peach	255–260
M.K. HASSAN, E.K. DANN, L.M. COATES, P.J. HOFMAN and D.E. IRVING: Retention of the fruit peduncle at harvest retains sap and contributes to resistance against post-harvest anthracnose disease in ‘Kensington Pride’, but not in ‘R2E2’ mango	261–266
M. SIVAPRASAD, R.S. POLICEGODRA, H.M. SWAROOP KUMAR and S.M. ARADHYA: Changes in the biochemical and bioactive constituents of Indian hog plum (<i>Spondias mangifera</i> Willd.) fruit during ambient storage	267–276
YUEYING LI, CHANG LIU, TIANCHUN LI, CHUANYIN WANG, YUEHUAN XIAO, LIN ZHANG, DANDAN JIN, YAN ZHAO, ZHU WANG, JUN CAO and LIN HAO: Regulatory role of exogenous salicylic acid in the response of <i>Zoysia japonica</i> plants to freezing temperatures: a comparison with cold-acclimatisation	277–283
P.J. MARTÍNEZ-GARCÍA, E. ORTEGA and F. DICENTA: Analysis of the expression of partial self-incompatibility in almond (<i>Prunus dulcis</i>)	284–290
A. ANANDA RAO, K. VIJAYAN, M. KRUBAKARAN, M.M. BORPUJARI and C.K. KAMBLE: Genetic diversity in mulberry (<i>Morus</i> spp.) revealed by isozyme markers	291–297
SAMMAR KHALIL and BEATRIX W. ALSANIUS: Effect of growing medium water content on the biological control of root pathogens in a closed soilless system	298–304
F. STRIKIĆ, Z. LIBER, D. BANDELJ MAVSAR, Z. ČMELIK, S. PERICA, M. RADUNIĆ, B. JAVORNIK AND Z. ŠATOVIĆ: Intra-cultivar diversity in the Croatian olive cultivar, ‘Lastovka’	305–311
ERRATUM	312
