

# Volume 123 Number 1 June 2011

## ORIGINAL PAPERS

**Best linear unbiased prediction and optimum allocation of test resources in maize breeding with doubled haploids**

X. Mi · T. Wegenast · H.F. Utz · B.S. Dhillon · A.E. Melchinger 1

**Extent and genome-wide distribution of linkage disequilibrium in commercial maize germplasm**

D. Van Inghelandt · J.C. Reif · B.S. Dhillon · P. Flament · A.E. Melchinger 11

**Genetic diversity and domestication history of African rice (*Oryza glaberrima*) as inferred from multiple gene sequences**

Z.-M. Li · X.-M. Zheng · S. Ge 21

**High-resolution mapping of *Rsn1*, a locus controlling sensitivity of rice to a necrosis-inducing phytotoxin from *Rhizoctonia solani* AG1-IA**

S. Costanzo · A.K. Jackson · S.A. Brooks 33

**Construction of a reference linkage map of *Vitis amurensis* and genetic mapping of *Rpv8*, a locus conferring resistance to grapevine downy mildew**

P. Blasi · S. Blanc · S. Wiedemann-Merdinoglu · E. Prado · E.H. Rühl · P. Mestre · D. Merdinoglu 43

**Mapping *Rph20*: a gene conferring adult plant resistance to *Puccinia hordei* in barley**

L.T. Hickey · W. Lawson · G.J. Platz · M. Dieters · V.N. Arief · S. Germán · S. Fletcher · R.F. Park · D. Singh · S. Pereyra · J. Franckowiak 55

**Pyramiding of *Ryd2* and *Ryd3* conferring tolerance to a German isolate of *Barley yellow dwarf virus*-PAV (BYDV-PAV-ASL-1) leads to quantitative resistance against this isolate**

C. Riedel · A. Habekuß · E. Schliephake · R. Niks · I. Broer · F. Ordon 69

**Genetic analysis of the sugarcane (*Saccharum* spp.) cultivar 'LCP 85-384'. I. Linkage mapping using AFLP, SSR, and TRAP markers**

S. Andru · Y.-B. Pan · S. Thongthawee · D.M. Burner · C.A. Kimbeng 77

**Functional relationships of *phytoene synthase 1* alleles on chromosome 7A controlling flour colour variation in selected Australian wheat genotypes**

A.C. Crawford · K. Stefanova · W. Lambe · R. McLean · R. Wilson · I. Barclay · M.G. Francki 95

**Genome-wide association mapping reveals epistasis and genetic interaction networks in sugar beet**

T. Würschum · H.P. Maurer · B. Schulz · J. Möhring · J.C. Reif 109

**Orchardgrass (*Dactylis glomerata* L.) EST and SSR marker development, annotation, and transferability**

B.S. Bushman · S.R. Larson · M. Tuna · M.S. West · A.G. Hernandez · D. Vullaganti · G. Gong · J.G. Robins · K.B. Jensen · J. Thimmapuram 119

**Positional cloning of *ds1*, the target leaf spot resistance gene against *Bipolaris sorghicola* in sorghum**

H. Kawahigashi · S. Kasuga · T. Ando · H. Kanamori · J. Wu · J. Yonemaru · T. Sazuka · T. Matsumoto 131

**Mapping and validation of QTL which confer partial resistance to broadly virulent post-2000 North American races of stripe rust in hexaploid wheat**

I. Lowe · L. Jankuloski · S. Chao · X. Chen · D. See · J. Dubcovsky 143

**A novel Robertsonian translocation event leads to transfer of a stem rust resistance gene (*Sr52*) effective against race Ug99 from *Dasypyrum villosum* into bread wheat**

L.L. Qi · M.O. Pumphrey · B. Friebe · P. Zhang · C. Qian · R.L. Bowden · M.N. Rouse · Y. Jin · B.S. Gill 159

**Integrating sorghum whole genome sequence information with a compendium of sorghum QTL studies reveals uneven distribution of QTL and of gene-rich regions with significant implications for crop improvement**

E.S. Mace · D.R. Jordan 169
