

**Special edition – The Utilization of Wastes as Construction Materials**

Editors: Professor Hilary I. Inyang; Professor T. Cássia de Brito Galvão; and Professor Godwin Mbamalu  
Assistant editor: Dr H.O. Zebulun

Utilization of industrial co-product materials as containment barriers in sustainable environmental applications <i>Charles Ochola and H. Keith Moo-Young</i>	333
Pilot-scale demonstration study of the impact of fly ash on soil fertility and crop yield <i>Mohini Saxena, P. Asokan, S. Murali, Bisham Yadav and S. Sangeeta</i>	345
Innovative building materials developed from natural fibres and industrial waste <i>Mohini Saxena, Prateek Mehrotra and P. Asokan</i>	355
Comparative characteristics of paints developed from fly ash, copper tailings and blue dust <i>Mohini Saxena, Sangeeta Tiwari and Lokesh Dhimole</i>	363
Treatment of recycled compost material with topsoil in order to control cracking of pavement infrastructure <i>Napat Intharasombat, Anand J. Puppala, Syed Qasim, Richard Williammee and Laureano R. Hoyos</i>	373
Erosion and urban sediment control using straw blankets woven from recycled plastic threads <i>Terezinha Cássia de Brito Galvão, Aloisio Rodrigues Pereira, Arnaldo Teixeira Coelho, Paula Rodrigues Pereira and Joaquim Fernandes Teixeira Coelho</i>	383
Evaluation of pozzolanic activity in mortars containing granite residues <i>João de Farias Filho, Gelmires A. Neves, Heber S. Ferreira, José Wallace B. do Nascimento, Romualdo R. Menezes and Luciana de Figueiredo L. Lucena</i>	389
Reuse of water treatment residuals from lime softening	
I. Applications for the reuse of lime sludge from water softening <i>J. (Hans) van Leeuwen, David J. White, Rob J. Baker and Christopher Jones</i>	393
II. Characterization of chemically stabilized lime sludge for use in structural fills <i>David J. White, R.J. Baker and J. (Hans) van Leeuwen</i>	417
III. <i>In situ</i> testing and cost analysis of a lime-sludge test embankment <i>Rob J. Baker, David J. White and J. (Hans) van Leeuwen</i>	435
