Research reports

- Predicting the cost of eradication for 41 Class 1 declared weeds in Queensland.
F. Dane Panetta, Steve Csurhes, Anna Markula and Martin Hannan-Jones. 42
- Seed dynamics of the invasive geophyte *Lachenalia reflexa* Thunb. in south-west Australia.
Kate Brown and Grazyna Paczkowska. 47
- Economic and environmental assessment of the performance of reduced rates of two post-emergence herbicides in an arid irrigated production system of central Australia: a pilot study.
Martin Hidalgo, Glen Oliver and S. Raghu. 49
- Root regenerative ability of silverleaf nightshade (*Solanum elaeagnifolium* Cav.) in the glasshouse.
Rex Stanton, Hanwen Wu and Deirdre Lemerle. 54
- Association between environmental factors and the occurrence of six fumitory species (*Fumaria* spp. L.) in southern-eastern Australia.
Gertraud M. Norton, Deirdre Lemerle, James E. Pratley and Mark R. Norton. 57
- Weed control and wheat cultivars (*Triticum aestivum* L.) responses to metribuzin application rate and timing in Iran.
Eskandar Zand, Mohammad Ali Baghestani, Mohsen B. Mesgaran, Reza Pourazr, Mansour Sarani, Masoumeh Younes-abadi and Sahar Mansourian. 67
- Phytophagous organisms associated with the woody shrub *Polygala myrtifolia* (Polygalaceae) and their potential for classical biological control in Australia.
Robin J. Adair, Stefan Naser and Val Stajsic. 72
